

Schröder+Schömbbs Public Relations GmbH

Disclosure Report

Date Submitted: May 26th, 2024

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

B Lab's Public Complaints Process

Any party may submit a complaint about a current B Corp through [B Lab's Public Complaint Process](#). Grounds for complaint include:

- 1) Intentional misrepresentation of practices, policies, and/or claimed outcomes during the company's [certification process](#)
- 2) Breaches of the B Corp Community's core values as expressed in our [Declaration of Interdependence](#)

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒
Biodiversity Impacts	☐	☒
Chemicals	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Others - Disclosure Industries

Topic	Clients in Controversial Industries
Summary of Issue	Schröder+Schömb's Public Relations GmbH is a PR and communications company that has had clients in the alcohol industry over the last 5 years. The nature of the company's services with clients in this industry involved public relations services for a product launch. All services sold by Schröder+Schömb's can be sold to both controversial as well as non-controversial industries.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	The revenue from clients in the alcohol industry represented 3.3% in FY 22-23.
Impact on Stakeholders	Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry. B Lab has flagged the involvement of companies with clients in controversial industries as a material issue and new standards will be created to address possible risks related to this matter.
Implemented Management Practices	Schröder+Schömb's Public Relations GmbH adhere to guiding principles that are known to all employees. One of these principles states: "We want to work for companies, brands, and products that make the world a better place and respect our culture." The company excludes certain sectors, such as tobacco, weapons, and gambling. In other sectors, the company scrutinizes the clients very carefully, including alcohol. The company examines the companies before entering into a collaboration. The final decision on whether to accept a client is made through a coordinated decision-making process involving senior staff and the team that will manage the client. The company will check the ecological sustainability strategy and the client's efforts towards responsible enjoyment and youth protection, through intensive preliminary discussions with the client prospect.

	Schröder+Schömb's Public Relations GmbH have rejected client inquiries in the past because they did not align with their philosophy, including cruise companies and fast-fashion retailers. The company's goal is to increasingly work with B Corp companies and other businesses where sustainability is at the core of their efforts. The company also plans to avoid clients from sensitive industries in the future. Schröder+Schömb's Public Relations GmbH does not require clients to adhere to their Code of Conduct. The company plans to provide clients with their Code of Conduct for their information, and request their Code of Conduct and review it for discrepancies. Even though clients are not required to follow their Code of Conduct, the company expects a statement from them if there are significant discrepancies in the value system.
