

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory Council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

DISCLOSURE QUESTIONNAIRE

Company Name: Vitalis Dr. Joseph
Date Submitted: 11/10/2022

Industries & Products	Yes	No
Please indicate if the company is involved in production of or trade in any the following. Select Yes for all options that apply.

B Corp Certification - Disclosure Questionnaire Documentation

PROVIDED BY: Vitalis Dr. Joseph

UPDATED AS OF: 11/10/2022

DISCLOSURE QUESTIONNAIRE CATEGORY	Environmentally Intensive Industries
TOPIC	Water Intensive Industries
SUMMARY OF ISSUE	As a Manufacturer of Personal Care Products , company operates in an industry that is water intensive. Aspects of the industry that make it water intensive include cleaning and production processes.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	Vitalis Dr. Joseph's on-site water intensity for 2020 was approximately 50.000m ³ (50,000 L)
IMPACT ON STAKEHOLDERS	As a water intensive industry, the manufacturing sector poses risks such as water stress or depletion of local water sources if water use is not appropriately managed. Vitalis Dr. Joseph uses 100% spring water. Vitalis Dr. Joseph's operations are not located in a water stressed region.
IMPLEMENTED MGT PRACTICES	Vitalis Dr. Joseph has achieved Zero Waste cosmetic status. They are in the process of developing some water-free formulas for rinse off products, balms. They are continuously optimizing their production and cleaning process (the cleaning process consumes more water than the production itself). In the year of 2021, the company has purchased a high-pressure water pump to reduce water consumption for cleaning of the machines.
