Disclosure Report

Date Submitted: September 28th, 2023

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒

Negative Social Impact	☐	☒
Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Others - Clients in Controversial Industries

Topic	Clients in Controversial Industries
Summary of Issue	The company is a digital transformation consulting company, and they worked with For-Profit Higher Education institutions to provide content and teaching services.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	The company taught classes in the for-profit higher education institutions totaling less than 1% of total revenue for each year. Courses offered: Futures of Climate Change & Ethics and Communications
Impact on Stakeholders	Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry. For-profit higher education providers are controversial for concerns about their business models, recruiting practices, and educational quality.
Management Practices	At the sales level, the company has a screening process (Impact Score) that tracks each potential client's commitment to CSR and SDG. Below a certain score, the company considers the potential client as at risk. The company either stops the sales process or adapt the process to include awareness and training to help their clients integrate these considerations in their own business.
