

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

B Corp Certification - Disclosure Questionnaire Documentation

PROVIDED BY: Mikuna UPDATED AS OF: 12/10/2020

DISCLOSURE QUESTIONNAIRE CATEGORY	Facilities located in or adjacent to sensitive ecosystems
TOPIC	Company has farms and processing facilities located adjacent to the Andean Cloud Forests of Ecuador.
SUMMARY OF ISSUE	The company's farms and processing facilities are located about 1 mile away from the Andean Cloud Forests that have been designated as environmentally sensitive areas by the Ecuadorian Government. They are considered sensitive because of their biodiversity and the number of endemic varieties of flora and fauna that are found within them. Furthermore, the protection of the Andean cloud forest ecosystem is crucial because of the array of environmental services it provides such as drinking water supply through the four bi-national rivers that originate in the ecosystem. Additionally, a portion of the protected Cloud Forests are part of the parcel of private land owned by the company.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	100% of the company's facilities are situated adjacent to the Cloud Forests.
IMPACT ON STAKEHOLDER(S)	The Andean Cloud Forests are endangered by human activities. The company's facilities such as farms and manufacturing unit are adjacent to the cloud forests which could potentially impact the flora, fauna and quality of the ecosystem.
IMPLEMENTED MGT PRACTICES	 0% of the company's fields or operation take place in the sensitive ecosystem area. The company has acquired Rainforest Certification for their products to ensure the protection and preservation of the environment and the land on which their operations take place. With respect to the portion of the Cloud Forests that are on company land, the company has a policy to not develop them in the future and the company intends to preserve them indefinitely in partnership with the Ecuadorian Government.

DISCLOSURE QUESTIONNAIRE CATEGORY	Environmentally Intensive Industries
ISSUE DATE	
TOPIC	Biodiversity Impact and Monoculture Agriculture
SUMMARY OF ISSUE	As a cultivator of chocho, Mikuna operates in an industry in which biodiversity impact and monoculture agriculture are material environmental issues.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	The company owns and controls 3000 acres of land of which approximately 30% is under cultivation while the rest (60%) of the land has been protected. The land is protected under Rainforest Alliance Certification.
IMPACT ON STAKEHOLDER(S)	Agriculture, particularly in cases where a single crop is cultivated at a time, poses a risk to local ecosystems of flora and fauna as well as the potential degradation of cultivated land. The clearing of natural habitat can result in the abundant decrease of local biodiversity and can also facilitate the entry of invasive alien species.
RESOLUTION	
IMPLEMENTED MGT PRACTICES	The company has acquired Rainforest Certification for their products to ensure the protection and preservation of the environment and the land on which their operations take place. The company is also working with the Rainforest Alliance team and the Ecuadorian Government to ensure that the local species in the Andean Cloud Forest are protected. The company has mapped the conservation area around their farm and work to minimally disturb any species surrounding our farm. They divide the farm area under cultivation in to subplots, and grow chocho only in some sub-plots at a time to allow the soil in the other sub-plots
	to rest. These sub-plots are rotated every season. They don't use fertilizers and for the pesticides that are used, they utilize spot spraying to reduce the amount of pesticides used. They also optimally select the varieties of chocho that have the most pest and disease resistant qualities.
