

# WASTE, THERE'S PLENTY TO MAKE A BIG DEAL ABOUT IT.

Today, tons of products are thrown away and yet millions of people do not have enough. What can we do to keep good products out of the bin and make them useful to others?

## OUR HUNGER TO ACT IS OUR MAIN COURSE!

Every day we all roll up our sleeves and do everything, absolutely everything, to make sure that our solutions against waste benefit everyone.

## FIRST OF ALL, WE'RE DOING TONS!

We help manufacturers and shops to manage their stocks efficiently and thus avoid the bin. We also give tons of unsold products to associations, day after day. The icing on the cake : we don't leave anyone behind! Thanks to our low-cost unsold goods baskets on our app, many people save money on a daily basis and shop owners benefit from an additional income. And that's the kind of good idea that makes everyone feel good!

## NO ONE COUNTS FOR PEANUTS... AND THAT DOESN'T MAKE US GO BANANAS!

Industrialists, shop owners, associations, consumers, Phenicians – we are all happy because our action against waste is supportive and positive!

We have already saved 120 million meals, that's 70 000 tons of unsold food and it's only the beginning!

From a simple click to field expeditions, in France and in the rest of the world, we will never stop finding technical and human solutions that will send wastage to the bin...
