

## Score Roll Up Methodology Nestle Health Science U.S. 2022

As the B Corporation Certification is a company-level certification, the assessment of a Parent Company is required to include its subsidiaries in which it owns >50% of the shares and has controlling interest. Depending on the operations of the certifying company, Parent Companies may roll up their subsidiaries into a single assessment or assess separately.

Regardless of whether a Certified Parent Company's subsidiaries are assessed together or separately, only distinct subsidiaries that B Lab has determined independently meet the performance requirement for certification are eligible to use the Certified B Corporation logo and refer to themselves as Certified B Corporations.

### Aggregated Scoring Methodology

Nestle Health Science US and its subsidiary Vital Proteins were required to be assessed in the B Impact Assessment and undergo a review by B Lab staff.

Nestle Health Science US and its Vital Proteins were divided into two assessments, and the overall score was calculated using a weighted average based on revenues.

The two assessments are as follows:

- Nestle Health Science US
- Vital Proteins

Based on the weighted average, Nestle Health Science US scored an overall 89.1 out of 200 total available points. The minimum verified score required for B Corp Certification is 80.

The table below shows the scores for the individual assessments:

Legal entity/Company name	BIA Score
Nestle Health Science US	92.4
Vital Proteins	80.6

### Brands

Brands that are not distinct operating subsidiaries included in the Parent Company's certification are not Certified B Corporations themselves, but may use the Certified B Corporation logo if B Lab has determined they have independently met the performance requirement for certification. Otherwise, the Certified B Corporation logo shall only be used in reference to the brand as part of the Parent Company's certification. For a list of brands under Nestle Health Science US, see below. Brand list Below is a list of brands included in the scope of certification at the time Nestle Health Science US Certified.
