Disclosure Report
Date Submitted: October 8th, 2025

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Operations located in Conflict Zones

Topic	The company has suppliers located in Conflict Zones.
Summary of Issue	<p>FairClimateFund has been involved since 2019 in a solar cooking project in Eastern Chad, specifically in the Iridimi and Touloum refugee camps in the Wadi Fira province. These camps host refugees from Sudan and are affected by cross-border conflicts, displacement, and humanitarian crises.</p> <p>The company does not buy products from conflict zones but provides clean cooking solutions through its local partner ADES, which acts as a tier-2 supplier.</p> <p>FairClimateFund works in this area to address energy poverty and environmental challenges, helping communities reduce firewood use, improve safety, and promote sustainable development.</p>
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	FairClimateFund does not purchase or sell physical products from conflict zones. However, the company reported that approximately 1% of its project-related expenditures in 2024 and 2% in 2023 were associated with its solar cooking project activities in Eastern Chad, implemented through its local partner ADES.
Impact on Stakeholder(s)	<p>Business activities located in conflict zones are considered high-risk as they are more likely to cause or contribute to the conflict and/or sociopolitical instability.</p> <p>Countries classified as conflict zones are more likely to have a weak rule-of-law or a corrupt judicial system, which could undermine the effectiveness of operational grievance mechanisms for these businesses and their suppliers. In addition, the safety of the company's workers and other potential human rights violations are at risk.</p>
Implemented Management Practices	The company maintains strict financial controls over its annual budget to prevent misuse and ensure resources directly benefit communities.

Management Comments	FCF serves a big need in refugee settings: energy to cook the food, without cutting trees around the camps. We strive to get more stoves to the camps. The funds needed are generated by selling the credits at www.fairclimatefund.nl - https://registry.goldstandard.org/projects?q=solar&page=1&countries=TD
