Disclosure Report

Date Submitted: October 28th, 2023

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Facilities Located in Sensitive Ecosystems

Topic	Company offers tours in protected areas in Argentina
Summary of Issue	Patagonia Road is a travel agency that provides tours of Argentina's National Parks and nature reserves. These areas are protected by the Argentinian government, which strictly regulates activities in these areas to ensure preservation. Camping, fires, logging, hunting, and other activities that may cause harm are strictly prohibited in the area.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	100% of the company revenues come from carrying out tours in these areas.
Impact on Stakeholders	These areas' wildlife and natural habitat are delicate ecosystems, vulnerable to modification or endangerment by untrained or unauthorized tour guides and large groups.
Implemented Management Practices	Patagonia Road organizes tours in small groups and all visits to Parks and Reserves are led by authorized individuals from the National Parks. These guides are often locals or members of traditional and indigenous communities. In addition, the company works closely with suppliers who share their commitment to the environment.
