

Hall Core Water

Disclosure Report

Date Submitted: January 22nd, 2024

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Water Intensive industry

Hall Core Water is involved in the production/sale of products, or is part of an industry that can potentially be classified as water intensive, meaning that they are more likely to have significant impacts on the environment, such as water stress or depletion of local water sources if water use is not appropriately managed. Certified B Corps are required to make transparent their involvement in such activities or industries.

Any party aware of specific company practices that have had a negative impact related to its involvement in these or other controversial industries, and which may constitute a violation of the B Corp standards, may contact us via our [public complaints procedure](#).

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Other - Clients in controversial industries

Topic	Clients in the mining industry
Summary of Issue	Hall Core Water is a water utilities & services company headquartered in South Africa. The company provides a full service offering that includes locating and abstracting water as well as the implementation, maintenance and monitoring of the infrastructure and water quality. The majority of the company's revenue (~65%) is supplying underserved rural communities with access to clean water. Currently this service is provided as part of a contract with a corporate sponsor (i.e., the rural communities do not pay for their water).
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	~65% of the company's clients are corporate sponsors in the mining industry.
Impact on Stakeholders	The mining industry represents a potential negative impact in the areas of labor practices and worker health and safety, the environment (including deforestation, water intensity, emissions intensity, and chemical intensity), and affected communities. For additional information on the potential negative impact of the mining industry, refer to B Lab's mining industry standards .
Implemented Management Practices	The objectives of Hall Core Water's client screening policy are as follows: - To assess the credibility and suitability of potential clients based on predetermined criteria. - To identify any potential risks or red flags associated with potential clients. - To protect the company's reputation and resources by avoiding association with individuals or organizations engaged in illegal, unethical, or fraudulent activities. - To comply with all applicable laws, regulations, and industry standards related to client due diligence and anti-money laundering (AML) practices. The client screening process includes an initial assessment, due diligence, risk assessment, and ongoing monitoring. The risk assessment will consider factors such as the client's reputation, financial stability, legal and regulatory compliance, and any past or ongoing legal or ethical issues. The risk assessment will help
