

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

DISCLOSURE QUESTIONNAIRE

Company Name: Brabantia
Date Submitted: 01/23/2023

Industries & Products	Yes	No
Please indicate if the company is involved in production of or trade in any the following. Select Yes for all options that apply.		
Animal Products or Services		✓
Biodiversity Impacts		✓
Chemicals		✓
Company Explanation Of Disclosure Item Flags		✓
Disclosure Alcohol		✓

DISCLOSURE QUESTIONNAIRE CATEGORY	Environmentally Intensive Industries
TOPIC	Energy and Emissions Intensive Industries
SUMMARY OF ISSUE	As a company that designs, develops and manufactures household products, Brabantia operates in an industry in which energy use and emissions are material environmental issues.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	In the previous fiscal year, 100% of the company's revenue was earned from the sale of its household products.
IMPACT ON STAKEHOLDERS	The manufacturing process of household items is energy intensive, which in turn contributes to global carbon emissions. The high energy intensive processes include plastic molding, degreasing, powder coating, and logistics. The main GHG emitted in the process is CO2. The carbon intensity is 0.1 kg CO2e / unit produced in 2021
IMPLEMENTED MGT PRACTICES	Brabantia has an ISO14001 certified environmental management system and is tracking their waste generation, water use, and energy use. It is also calculating their GHG emissions. In order to reduce the carbon emissions of their production process, the company meets 48.7% of their energy demands from renewable electricity. Part of this electricity (4.7%) comes from the solar cells installed on the roofs of their European facilities. For the remaining of their energy requirements, 31.6% comes from 'compensated gas', that is natural gas which carbon emissions are compensated, while the last 19.6% comes from grey electricity and gas.
