

Trendy

Disclosure Report
Date Submitted: July 21st, 2023

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒
Biodiversity Impacts	☐	☒
Chemicals	☐	☒
Disclosure Alcohol	☐	☒
Disclosure Firearms Weapons	☐	☒
Disclosure Mining	☐	☒
Disclosure Pornography	☐	☒
Disclosure Tobacco	☐	☒
Energy and Emissions Intensive Industries	☒	☐
Fossil fuels Gambling	☐	☒
Genetically Modified Organisms	☐	☒
Illegal Products or Subject to Phase Out	☐	☒
Industries at Risk of Human Rights Violations	☐	☒
Monoculture Agriculture	☐	☒
Nuclear Power or Hazardous Materials	☐	☒
Payday, Short Term, or High Interest Lending	☐	☒
Water Intensive Industries	☒	☐
Tax Advisory Services	☐	☒

Outcomes & Penalties

	Yes	No
Please indicate if the company has had any formal complaint to a regulatory agency or been assessed any fine or sanction in the past five years for any of the following practices or policies. Check all that apply.

Business in Conflict Zones	☐	☒
Child or Forced Labor	☐	☒
Negative Environmental Impact	☐	☒
Negative Social Impact	☐	☒
Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Environmentally Intensive Industries

Topic	Energy and Emissions Intensive Industries
Summary of Issue	As a food manufacturing company, Trendy products are energy and emissions intensive. Trendy has a Food Manufacturing plant based in Chile which has an intensive consumption of energy for the production of ice cream. The company's main contributor is the consumption of electricity by their machinery and the acquisition and transportation of raw materials and finished products. The company's main sources of consumption are natural gas and liquefied petroleum gas. The company has attached indicators regarding electricity consumption for 1000 liters of ice cream produced, whose average in 2022 was 229 kWh.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	100% of Trendy's revenues comes from energy-intensive products.
Impact on Stakeholders	Food manufacturing is a major contributor to global carbon emissions.
Implemented Management Practices	Trendy has an internal training program on awareness of energy consumption. The company is measuring its corporate carbon footprint for the second time, which means they will be able to compare the results with a past year for the first time. According to the results, the company hopes to apply improvements to reduce their footprint. There is no established plan yet, as the company will await the results. Trendy does not perform an assessment of how it compares to others in its industry in terms of energy use, carbon emissions, and/or how these impacts are managed.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Environmentally Intensive Industries

Topic	Water Intensive Industries
Summary of Issue	As a food manufacturing company, Trendy products are water intensive. Trendy has a Food Manufacturing plant based in Chile which has an intensive consumption of water for the production of ice cream and for washing the machinery. Company sources from Aguas Andinas, a general drinking water network. The company states that its production operations on the San Bernardo plant, are not located in a region with water stress. Finally, for the year of 2022, the consumption was - on average - 3.3 m3 of water per 1000 liters of ice cream produced.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	100% of Trendy's revenues comes from water intensive products.
Impact on Stakeholders	Water intensive industries pose risks such as water stress or depletion of local water sources if water use is not appropriately managed.
Implemented Management Practices	The company's plant has water awareness and production efficiency training. Trendy does not perform an assessment of how it compares to others in its industry in terms of water use and/or management.
