

## B Corp Certification - Disclosure Questionnaire Documentation

COMPANY:

ERGY

UPDATED AS OF:

06/07/2024

DISCLOSURE QUESTIONNAIRE CATEGORY	Other - Clients in Controversial Industries
TOPIC	Company serves clients in Controversial Industries
SUMMARY OF ISSUE	ERGY is a sustainable energy consulting and installation company that specialize in installing photovoltaic panels and offer services such as audit and quality control, energy efficiency consulting, and personnel training. The company provides services to clients in controversial industries such as mining. Their services can also be sold to non-controversial industries.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	For the fiscal year 2023, clients in the mining sector contributed approximately 53% of the company's total revenue.
IMPACT ON STAKEHOLDER(S)	<p>Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry.</p> <p>B Lab has flagged the involvement of companies with clients in controversial industries as a material issue and new standards will be created to address possible risks related to this matter.</p>
IMPLEMENTED MGT PRACTICES	The company does not have a formal stance on working with clients in controversial industries. The company's services are aimed at improving the sustainability performance of their clients. The company's quality policy and ethical code focus on reducing the impact of operations on the environment, promoting sustainability, and preventing contamination. While working with clients in the mining sector, the company aims to help mining companies succeed in their energy projects while minimizing environmental impact and helping them integrate renewable energy effectively and sustainably. The services provided to clients in the mining sector include audits and quality control, energy efficiency consulting, and personnel training and development.

**MANAGEMENT COMMENTS**

At ERGY, we are dedicated to sustainability and environmental responsibility. Although the mining industry may be controversial due to its environmental impact, we believe it is possible to collaborate with these companies to improve their practices and reduce their ecological footprint.

We work with mining companies, offering renewable energy solutions to reduce environmental impact and pollution. Our mission is to promote energy change through technologies, leading and accompanying all sectors in the transition towards a sustainable future with efficient and innovative solutions. Our vision is to be a benchmark in energy sustainability, promoting positive changes through innovation, development, and efficiency in the transition to a clean and sustainable future.

We firmly believe that collaboration between the mining industry and companies like ours is essential to promote more sustainable practices and to move towards a cleaner, more sustainable future for all. We are committed to continuing to work with mining companies to implement solutions that reduce their environmental impact and contribute to the protection of our planet.

At ERGY, we will continue working to offer innovative services and solutions that facilitate the transition towards a more sustainable and environmentally friendly energy model.
