Disclosure Report

Date Submitted: January 27th, 2026

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Industries at risk for human rights violations and disclosure mining

Topic	The company manufactures jewellery on a small scale and sources jewellery from 3rd party manufacturers.
Summary of Issue	ANUKA Jewellery is a jewellery business reliant on precious metals and stones -- raw materials that could be considered conflict minerals and pose a potential human rights risk during the mining process. It purchases its minerals through distributors and manufacturers, not directly from mine sites.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	The company has indicated that 100% of their material sourcing comes from Fairmined certified suppliers.
Impact on Stakeholder(s)	The use of precious metals and gemstones poses a human rights risk due to the possibility that they are sourced from conflict-affected and high risk areas, where they may be used to finance conflict and/or be associated with human rights abuses in the supply chain.
Implemented Management Practices	<p>ANUKA Jewellery itself, and its manufacturers VIPA DESIGNS & D&M JEWELLERY FINISHERS are all Fairmined authorised suppliers. 50.6% of total cost is covered by these certifications. The company is able to track every order and gram of gold used directly back to the Fairmined authorised artisanal mines in Colombia & Peru. These manufacturers also supply the 100% recycled silver used in ANUKA Jewellery's collections and the company has clear access to the process and origins of the recycled precious metal sourced in Germany through a member of the Responsible Jewellery Council.</p> <p>ANUKA Jewellery sources its diamonds via a distributor (FAIRTRADE GEMSTONES) who supply certified CANADA MARK diamonds and are a registered supplier of CANADA MARK, these are fully traceable back to the mine and are laser inscripted with a serial number which can be used to track the stone direct to the mine. It sources precious gemstones from (NINETEEN48 LTD) who work directly with the mines. Nineteen48 own mines and cut their own gemstones. Both companies can provide exact sourcing information of where</p>

each gemstone is mined and cut and support small scale artisanal miners, their communities and environments.

The company indicates only working with gemstone suppliers who have direct mine to market supply chains, currently there are no established trade bodies that trace the gemstone supply chain from mine to market, therefore it sees it as its responsibility to work closely with gem dealers with only the most transparent supply chain.

Where certifications are not feasible e.g. 100% recycled silver, the company looks for suppliers to provide letters of assurance of where the bullion is processed and the methods used. It also looks for compliance with local laws and regulations, and excellent labour practices.

ANUKA Jewellery asks for proof of certifications from companies, e.g. Fairmined gold, Responsible Jewellery Council, FSC certification, to prove integrity of product and supply chain. As most suppliers are local to the company, it makes every effort to visit each site, allowing it to further understand the company values, their environmentally-friendly practices and methods along with the health and safety of the workplace and the well being of the employees.

The company is also in regular contact with its suppliers, building strong relationships and asking for any information it requires.
