

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

B Corp Certification - Disclosure Questionnaire Documentation

PROVIDED BY: Bee Squared Apiaries UPDATED AS OF: 11/29/2021

| DISCLOSURE QUESTIONNAIRE CATEGORY | Animal Products and Services |
|--|--|
| торіс | Company operates a honey farm and has direct control over the treatment of bees in its care. |
| SUMMARY OF ISSUE | Bee Squared is involved in the production and sale of pure varietal Honey, and other bee products and bee based products. |
| SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected) | Bee Squared has 125 hives in various locations in Weld, Larimer and Boulder counties. The company manages 150 colonies from Denver to Wellington, covering a distance of approximately 75 miles. The colonies are kept in urban, suburban and rural areas. There are bee yards ranging from 2 colonies to 16 colonies. An average of 50,000 bees reside within a colony. |
| IMPACT ON STAKEHOLDERS | Bee Squared spreads out bees across the landscape to ensure adequate resources. Industrially managed acreage is avoided to limit bee exposure to chemical pesticides. When honey supers are removed, adequate honey is left in brood chambers for the colony as well as sufficient resources in the environment for them to continue to forage and bulk up for the winter. Based on weight measurement, Bee Squared feeds sugar in the spring and in the fall, if necessary. |
| IMPLEMENTED MGT PRACTICES | Weekly inspections during the spring ensure that bees are healthy and disease-free. European Foulbrood disease, (of the few visible bee diseases) is treated by removing the contaminated frames and replacing them with uncontaminated ones until the colony is able to control the problem by itself. |
| | The company does not use any plastic in its colonies; wax and wire are used instead. |
| | The company owner has founded a non-profit called ""People and Pollinators Action Network (PPAN)" to promote planting of pollinator habitat and is Treasurer of the non-profit Pollinator Stewardship Council. |
