

Sustainable private
label accessories for
companies that care.

/ITC

The future is circular and we know how to get there. ITC helps fashion brands and retailers make their business more sustainable by providing the largest selection of sustainable fashion solutions on the market.

While demand for responsibly sourced fashion is increasing every day, we can help you meet your customer's wishes.

Our goal is to nudge the industry towards a circular lifecycle. By decreasing the impact we have on the environment, our economy, industry, and our planet can benefit. We have the roadmaps to get your company into the sustainable era.

/TC ACCESSORIES

Private label done better.

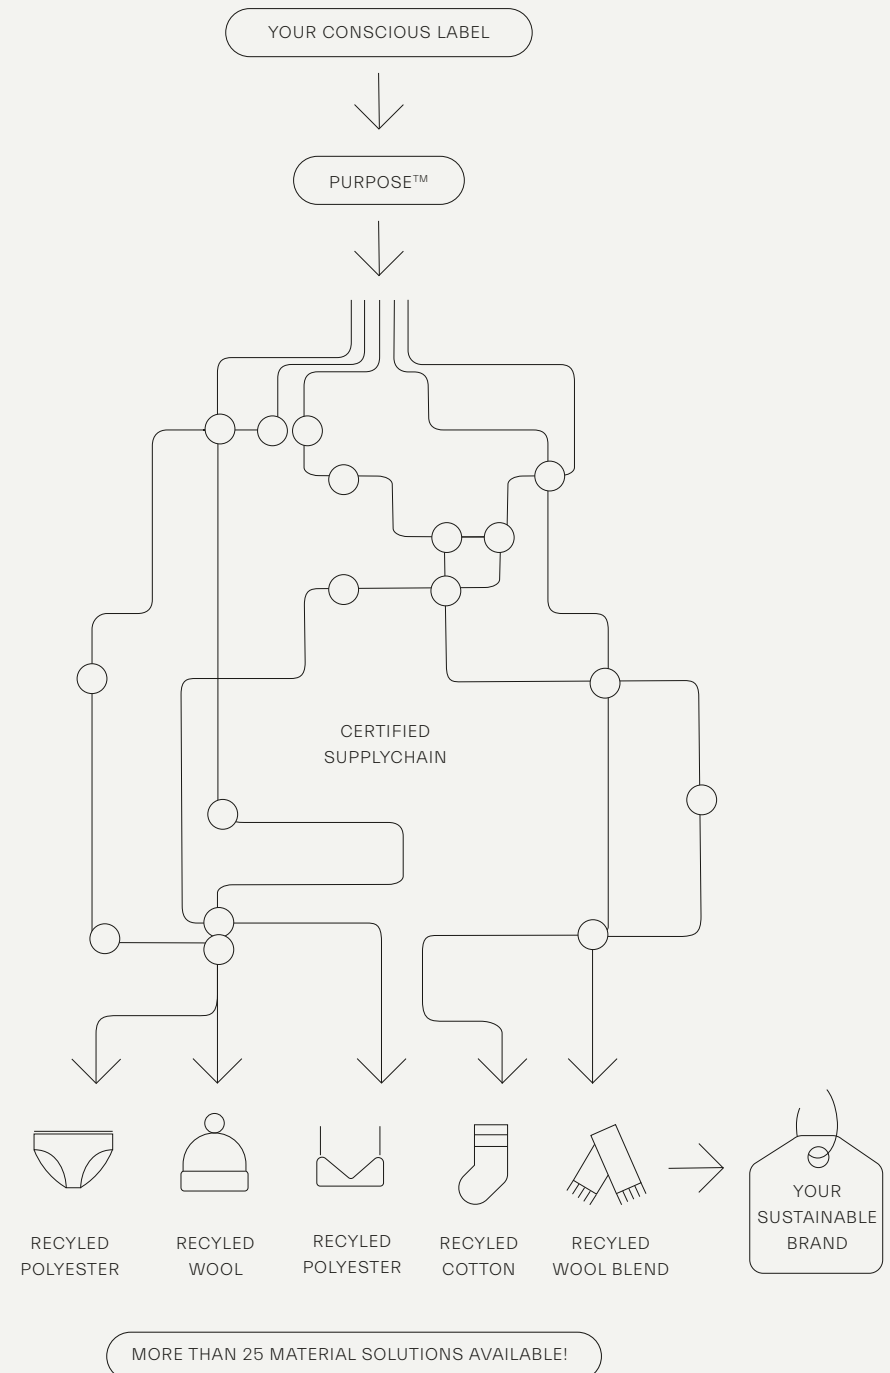

Join conscious brands and retailers who trust our responsible approach.

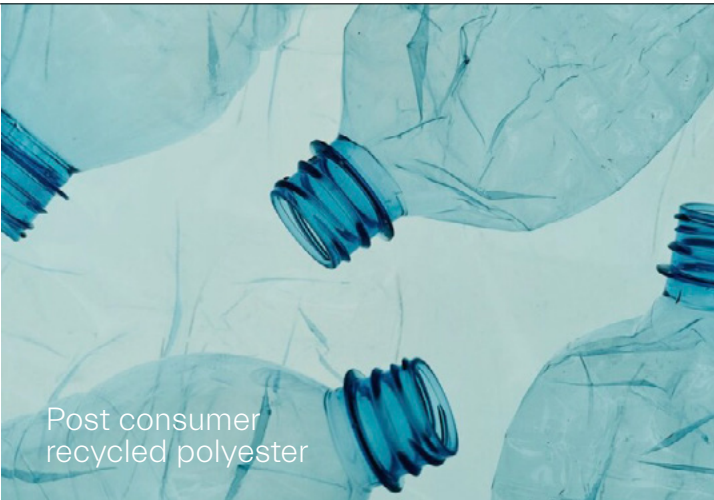

WE SERVE OVER 50 CUSTOMERS IN EUROPE,
NORTH AMERICA, AUSTRALIA AND CHINA.

Need a supply chain for your sustainable fashion accessories?
Let Purpose™ be your guide.

We've gone ahead and done the work for you.
Purpose™ is our exclusive sustainable platform
that will connect your company to a large variety
of GRS-certified recycled solutions.
From used fabric to discarded PET bottles:
we turn waste into opportunities.

Choose Purpose™, and you choose more than 25 recycled material solutions, traceability design, and production all combined in one solution.

All materials that come through the Purpose™ platform are made from upcycled fabric and PET bottle waste. Materials that would otherwise end up in the landfill are upcycled into new, high-quality yarn. This reduces the industry's reliance on virgin materials while limiting harmful environmental impacts. Purpose™ materials take no chemicals to produce, and the recycling process uses less water and emits less CO2 than the production of virgin materials.

ITC is proud to work with the best sustainable solutions in Europe and North America today.

We are the preferred partner of innovative companies such as Circular Systems (Agraloop, Orbital, Texloop) and Indidye.

Our solutions

Our certifications

Member of

CERTIFICATION

Certifications for our supply chains include the Global Recycled Standard (GRS), Responsible Wool Standards (RWS), Global Organic Textile Standard (GOTS), and Better Cotton Initiative (BCI) certified.

SUPPLY CHAIN

The supply chains for our products are stable, transparent, and third party verified. So you can be certain of each item's sustainable pedigree.

QUALITY

For us, sustainability never means a sacrifice in quality. Everything we create meets or exceeds the quality of competing non-sustainable products.

PRICE

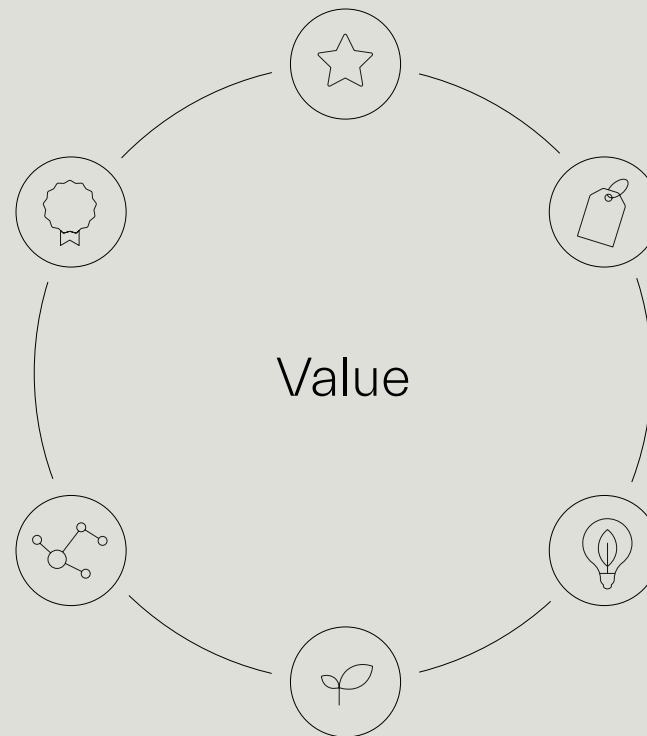

Access is essential. We aim to keep our prices equivalent to conventional, non-sustainable products - so it's easy for more people to make sustainable choices.

CONSCIOUS DESIGN

Design sets us apart. Every design is rooted in low impact materials and methods, and takes into account the entire lifecycle of each item we create.

SUSTAINABILITY

We offer the most options on the market when it comes to sustainable materials - from post-consumer recycled fibres, to plant dyed yarns, to textiles made from upcycled food crop waste.

We make it easy for more brands and retailers to make responsible choices
