

Allora Infrastructure

Disclosure Report

Date Submitted: January 12th, 2026

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production of or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒
Biodiversity Impacts	☐	☒
Chemicals	☐	☒
Disclosure Alcohol	☐	☒

Negative Social Impact	☐	☒
Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Other Disclosure Industries

Topic	Clients in Controversial and Ineligible Industries
Summary of Issue	Allora Infrastructure has clients in the following industries: Nuclear Power/Radioactive Material The types of services/products offered to these clients include: - strategic advisory services to support nuclear energy clients in developing their delivery models, including providing advice on one of their specific programmes - Projects and Asset Care Execution, aimed at maintaining asset condition and providing new asset capabilities to support safe operations.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	In the last fiscal year, 14.62% of the company's annual revenue was from clients in the Nuclear Power/Radioactive Material industry.
Impact on Stakeholder(s)	Companies that work with clients in controversial industries can directly or indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry. Companies offering certain types of services and products to controversial clients are required to have at minimum a grievance/complaints mechanism and a whistleblower protection policy.
Implemented Management Practices	B Lab has been able to verify that the company has the necessary mechanisms in place to manage the risks related to their business relationships with clients in controversial and ineligible industries, in line with B Lab's requirements (see link below). This includes: - A mechanism for internal and external stakeholders to raise grievances; - A policy that is shared with individuals who raise a grievance, containing information related to the grounds for accepting a grievance and how their grievance will be dealt with, as well as related timelines;

	- A Whistleblower Policy that establishes the company's commitment to protecting whistleblower identity as well as the processes and controls in place to protect stakeholders who raise grievances from any form of retaliation.
Report	B Lab's Compliance Criteria for working with clients in controversial or ineligible industries
Management Comments	We apply Allora's Pursuit Principles process to ensure Allora only provides advice to clients working in the nuclear sector if the team believes the programme aligns positively with the Sustainable Development Goals and we have the right level of sponsorship with the client to ensure we can make meaningful change from our advice. Allora continuously reviews this throughout the lifecycle of the project.
