Does your organizational culture enable elite-level software engineering?

3-Day Workshop: Software Delivery Foundations for Leaders

As a leader, inspiring your engineering team to achieve business objectives can be a challenge.

In this 3-day workshop, your engineering leadership team and organizational stakeholders will go beyond basic practices. You'll deep-dive into organizational principles and advanced topics to enable elite-level performance.

Your leadership team will leave with a concrete implementation plan for adopting practices which will lead to increased software delivery performance.

Key drivers of developer velocity:

Adopt the basics
Agile, open-source, public cloud

Product management skills
Feedback loops btw. business & engineering

Empower the team
Standardize tools, embrace automation, provide flexibility

Build a generative culture
Fair pay, incentives, psychological safety, collaboration

Caravel Labs is technology consultancy for social impact. Our team of global tech talent is passionate about delivering business outcomes through software. We use rigorous, proven-effective software engineering principles, practices, and tools to rapidly implement software for social innovators.
