Disclosure Report

Date Submitted: December 1st, 2023

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Disclosure Industries

Topic	Clients in Controversial Industries
Summary of Issue	ZeTrace offers consulting services for digital e-commerce and marketplace and they have clients in the alcohol, fossil fuels, and the Nuclear Power, hazardous materials industry. Services to clients in the Alcohol Industry and Fossil Fuel industry included digital purchase platform, CRM platform and marketplace scoping. Services for clients in the Nuclear Power or Hazardous Materials industry involved the design of a new circular platform to avoid waste of tools in nuclear power plants.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	3% of the company's revenue in 2022 comes from the alcohol industry. (3 clients) 1.13% of the company's revenue in 2022 comes from the fossil fuel industry. (1 client) 0.5% of the company's revenue in 2022 comes from the Nuclear Power or hazardous materials industry. (1 client)
Impact on Stakeholders	Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry. B Lab has flagged the involvement of companies with clients in controversial industries as a material issue and new standards will be created to address possible risks related to this matter.
Implemented Management Practices	The company decides whether a client and/or a mission can be accepted or not during the initial meetings and uses impact assessment with internal scoring to determine whether to continue with clients. Their client screening policy evaluates the company's mission, its respective potential impact to stakeholders as well as a consideration of whether ZeTrace can help mitigate these impacts. The company does not have a position on working with companies in controversial industries.

Management Comments	ZeTrace has only implemented in 2023 its "impact scoring tool" that enables users to decide ahead of a mission whether to accept or not a controversial client / mission. We now have a review process and a scoring of positive vs. Negative impact on People and Planet. We are more than before able to screen controversial industries and keep reducing our share of business done with them.
