Who We Are

We are a professional learning organization committed to transforming education by advancing a learner-centered future. We work to inspire changes within the classroom while building the long-term, systemic support needed to sustain these shifts. Through deep engagement at every level of the system, we aim to ignite two interconnected revolutions:

- **Reshaping the Learner Experience:** We empower educators with transformative, learner-centered experiences that model the environments students deserve and provide practical strategies to implement immediately.
- **Reimagining the System:** We partner with communities to align policies, structures, and practices, creating the conditions for learner-centered approaches to be supported, sustained, and scaled systemwide.

Our Vision:

We envision a future education system where each learner engages in personalized and relevant experiences that build competence and confidence for their future, empowering them to contribute meaningfully to their communities and society.

Our Mission at 2Revolutions:

- **Transform the Student Experience:** Reshape classrooms to create learner-centered environments where each student thrives.
- **Empower Educators:** Empower educators with co-designed professional learning that mirrors the learner-centered environments we envision for students, driving meaningful shifts in teaching and learning.
- **Align System Conditions:** Partner with communities to calibrate policies, structures, and supports that sustain learner-centered approaches, fostering coherence and continuous improvement to sustain high-impact, learner-centered systems.

Our Theory of Action

When 2Revolutions collaborates with people and organizations within systems to co-create a community-driven vision of student success, we focus on three key action areas that operationalize our mission:

-  **Build Capacity for Transformation:** Equip educators through credentialed, learner-centered experiences and coaching that foster shifts in their knowledge, skills, and mindsets.
-  **Collaborate to Catalyze System Coherence:** Partner with communities to identify, strategize, and create the conditions needed for greater coherence, continuous improvement, and the sustainability of impactful, learner-centered practices across all levels.
-  **Empower Sustainable Local Leaders:** Develop and support local lead learners who can embed, refine, and scale learner-centered approaches system-wide, ensuring these practices endure beyond our direct engagement.

so that **our vision** is realized: each learner engages in personalized and relevant experiences that build competence and confidence for their future, empowering them to contribute meaningfully to their communities and society.
