Disclosure Report
Date Submitted: June 30th, 2025

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

B Lab's Public Complaints Process

Any party may submit a complaint about a current B Corp through [B Lab's Public Complaint Process](#). Grounds for complaint include:

- 1) Intentional misrepresentation of practices, policies, and/or claimed outcomes during the company's [certification process](#)
- 2) Breaches of the B Corp Community's core values as expressed in our [Declaration of Interdependence](#)

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Supply Chain Disclosure

Topic	Suppliers in the Mining Industry
Summary of Issue	<p>Arte Groep is a remodeling company that uses granite and marble in its projects.</p> <p>Arte Groep has taken steps to ensure the raw materials it purchases are fully traceable and have third-party certifications verifying that they are ethically sourced. The materials are sourced from natural stone quarries in India, Italy, and Belgium.</p>
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	7% of the company's Cost of Goods Sold comes from raw materials that would be considered of high social and environmental risk, including marble and granite.
Impact on Stakeholders	Companies that purchase mineral resources such as marble and granite have a higher risk of encountering social and environmental issues in their supply chains. Specifically, biodiversity risks, human rights violations, and contributions that fund armed conflict (directly or indirectly) are material risks present in the industry.
Implemented Management Practices	<p>To manage the risks involved in the supply chain, Arte Groep has the XertifiX-seal. XertifiX is an NGO that conducts on-site audits and offers a certificate as proof of responsible action (CSR) for companies. Aspects considered in the audits include: Environmental Management System, Pollution and Waste Management, Installation of a grievance mechanism for affected communities, Living conditions of the workers (if accommodation is provided), Ecosystem and protected areas, and Energy Management.</p> <p>In addition to the audits conducted by XertifiX, Arte Groep makes regular visits to their suppliers and the quarries to verify if the activities conducted are in compliance with the Code of Conduct signed between both parties. Arte Groep is also part of the Fund Against Child Labour, which monitors that no violations in this regard are committed.</p> <p>Arte Groep signed the TruStone Initiative Agreements regarding responsible business conduct in the natural stone sector, led by the Dutch and Flemish governments.</p>

	Beyond that, the company claims to be looking for other alternative materials to granite, such as composite and ceramic. As a result, they expect their sales of worktops made of granite to become smaller in the coming years.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Biodiversity and/or Monoculture

Arte Groep is involved in activities that could affect local biodiversity, meaning that they are more likely to have significant impacts on the environment given its interference with the balance of local fauna and flora. Certified B Corps are required to make transparent their involvement in such practices.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Industries at Risk of Human Rights Violations

Arte Groep is involved in the Mining Industry. This industry is reliant upon materials at high risk of human rights infringements, meaning that the company is responsible for ensuring they have enough practices and policies in place to prevent and mitigate negative impacts in their operations and value chain. Based on the size of the company, these impacts may be limited. Certified B Corps are required to make transparent their involvement in such industries.
