

Ecoflora

Disclosure Report
Date Submitted: October 17th, 2025

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

B Lab's Public Complaints Process

Any party may submit a complaint about a current B Corp through [B Lab's Public Complaint Process](#). Grounds for complaint include:

- 1) Intentional misrepresentation of practices, policies, and/or claimed outcomes during the company's [certification process](#)
- 2) Breaches of the B Corp Community's core values as expressed in our [Declaration of Interdependence](#)

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒
Biodiversity Impacts	☐	☒
Chemicals	☐	☒
Disclosure Alcohol	☐	☒
Disclosure Firearms Weapons	☐	☒
Disclosure Mining	☐	☒
Disclosure Pornography	☐	☒
Disclosure Tobacco	☐	☒
Energy and Emissions Intensive Industries	☒	☐
Fossil fuels Gambling	☐	☒
Genetically Modified Organisms	☐	☒
Illegal Products or Subject to Phase Out	☐	☒

Business in Conflict Zones	☐	☒
Child or Forced Labor	☐	☒
Negative Environmental Impact	☐	☒
Negative Social Impact	☐	☒
Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Animal Testing

Topic	Required animal testing by regulatory authorities
Summary of Issue	Ecoflora manufactures natural colorants for the food industry. The company is based in Colombia and is required to undergo animal testing for a new product jagua blue (azul de jagua), by regulatory authorities, as the FDA and the European Food Safety Authority (EFSA), to guarantee food safety standards. The company states that there are no alternatives to animal testing possible at the time.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	50 % of the company's portfolio products undergo animal testing.
Impact on Stakeholders	Animal testing and experimentation is widely used to develop new products and to test their safety. Many of these experiments can cause pain or discomfort to the animals involved, or reduce their quality of life in other ways.
Implemented Management Practices	The criteria for selecting a laboratory are: 1. The lab had experience with these types of tests. 2. The lab follows the Good Laboratory Practice (GLP) standards. 3. The FDA must approve the lab's animal welfare protocol before conducting the test. The company does not have an animal testing policy.
Other Management Comments	We only test on animals if it is mandatory (if not in vitro test is available).

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Energy and Emissions Intensive Industry

Ecoflora is involved in the production/sale of products, or is part of an industry that can potentially be classified as energy and emission-intensive, meaning that they are more likely to have significant impacts on the environment based on their carbon emissions associated with their operations and their contribution to climate change. Certified B Corps are required to make transparent their involvement in such activities or industries.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Water Intensive Industry

Ecoflora is involved in the production/sale of products, or is part of an industry that can potentially be classified as water-intensive, meaning that they are more likely to have significant impacts on the environment, such as water stress or depletion of local water sources if water use is not appropriately managed. Certified B Corps are required to make transparent their involvement in such activities or industries.
