Disclosure Report

Date Submitted: March 17th, 2025

© B Lab 2023

## **Disclosure Materials**

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

## **Disclosure Questionnaire**

#### **Industries and Products**

#### Yes No Please indicate if the company is involved in production of or trade in any of the following. ## **Disclosure Questionnaire Statement**

Disclosure Questionnaire Category: Other - Clients in Controversial and Ineligible Industries

Topic	Clients in Controversial and Ineligible Industries
Summary of Issue	Platypus Digital has clients in the following industries: Charity Lottery.
	The types of services offered to these clients include: - Marketing and advertising campaigns services.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	In the last fiscal year, 1% of the company's annual revenue was from clients in the Charity Lottery industry.
Impact on Stakeholder(s)	Companies that work with clients in controversial industries can directly or indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry.
	Companies offering certain types of services and products to controversial clients are required to have at minimum a grievance/complaints mechanism and a whistleblower protection policy.
Implemented Management Practices	Platypus Digital has the following mechanisms in place to manage the risks associated to serving clients in the controversial industries:
	Grievance/complaints mechanism. This is accessible to the public through the Grievance Policy available on the company's website, including all the available channels to raise a complaint. Once a grievance is submitted, the company acknowledges its receipt within 24 hours. The company assesses the grievance to ensure it aligns with the grounds for acceptance, which include issues related to working conditions, professional relationships, employment terms, ethical concerns and discrimination and harassment. The complainant will be informed of the grievance progress at key stages, which include

a Preliminary meeting (days 3-5); Investigation phase (days 6-25); and Resolution process (days 26-30). Throughout this process, Platypus Digital is committed to facilitating resolution through mediation, structured conversations, policy review, workplace adjustments, or other appropriate measures depending on the nature of the grievance. The company is committed to transparent communication throughout the process and the complainant will receive regular updates at each stage of the investigation, including detailed explanations of findings and outcomes. If the company cannot accept a grievance, it will provide a clear rationale explaining why it falls outside the scope of this policy and suggest alternative approaches. If the complainant is dissatisfied with the resolution, they may submit a written appeal within 10 working days.

Platypus Digital implements regular assessment by conducting:

- Annual policy evaluation
- Staff feedback surveys
- Outcome tracking
- Pattern identification
- Improvement planning

Whistleblower Protection Policy. This policy is accessible to the public through the company's website and is focused on concerns related to potential wrongdoing, such as illegal activities, safety risks, or ethical breaches. The policy offers enhanced protections and confidentiality measures, including the option to report anonymously. The company developed a multi-layered approach to protection, making everything available from career impacts to personal security:

- Confidentiality safeguards: the company makes sure any concerns are handled confidentially;
- Career protection: these are the protections in place for anyone who raises a concern as employment safeguards, protected employment status and performance evaluation protection, among others.
- Personal security: risk assessment that includes individual risk evaluation, digital protection protocols and communication security among others.
- Legal protection: legal support and rights protection.

Platypus Digital takes a zero-tolerance approach to retaliation,

	and has robust monitoring and enforcement mechanisms to enforce that. Any retaliation action against a whistleblower will result in immediate investigation, disciplinary actions, which may include termination of employment, and possible corrective measures. Platypus Digital provides comprehensive support services for whistleblowers:  • Internal support: mental health resources, therapy and mediation  • External support: legal advisors, counseling services, financial advice, career support and family assistance.
