

Fors Marsh

Disclosure Report

Date Submitted: October 3rd, 2025

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production of or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒
Biodiversity Impacts	☐	☒
Chemicals	☐	☒
Disclosure Alcohol	☐	☒
Disclosure Firearms Weapons	☐	☒
Disclosure Mining	☐	☒
Disclosure Pornography	☐	☒
Disclosure Tobacco	☐	☒
Energy and Emissions Intensive Industries	☐	☒
Gambling	☐	☒
Genetically Modified Organisms	☐	☒
Illegal Products or Subject to Phase Out	☐	☒
Industries at Risk of Human Rights Violations	☐	☒

Business in Conflict Zones	☐	☒
Child or Forced Labor	☐	☒
Negative Environmental Impact	☐	☒
Negative Social Impact	☐	☒
Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Clients in Ineligible Industries

Issue Date	Ongoing
Topic	Company provides services to clients in defense sector
Summary of Issue	B Lab has concluded that providing services to the defense sector has inherent potential risk. Fors Marsh Group conducts a range of services for the U.S. Department of Defense focused on supporting Military personnel and their families. This support spans a range of issues including measuring public opinion towards military service, reducing discrimination and harassment, improving family support and mental health, and reducing substance abuse and suicide risks among service members. The overall scope of services includes research, outreach, training, and consulting. This includes research and communication focused on increasing awareness and consideration of Military service (and generally, public service) as a career option.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	Approximately 40% of the company's revenue is from the Department of Defense.
Impact on Stakeholder(s)	B Lab has concluded that providing services to the defense sector has inherent potential risk; namely ethical implications of these services being used in a way that harms others and/or is misused, a lack of transparency, and other risks pertaining to private sector involvement in activities related to warfare. Fors Marsh Group delivers services to the U.S. Department of Defense, a branch of the democratically elected Government, across a broad range of issues. All of these issues are in support of Military personnel and their families and impact the readiness and resilience of the All Volunteer Force.
Implemented Management Practices	Fors Marsh Group supports the sustainment of the all-volunteer force and the well-being of those who choose to serve in the Military. All of the research conducted with DoD is guided by legal and ethical guidelines. FMG's researchers maintain up-to-date human subjects research training certifications and all DoD research is reviewed by an independent Institutional Review Board (IRB) prior to implementation. We have strict

	protections in place to ensure participant anonymity; any identifiable information collected (e.g., to address mailing materials) is stored separately from participant responses. This information is handled only by survey operations personnel and is not provided to DoD. Fors Marsh Group maintains robust policies across all clients and services for anti-bribery, anti-corruption, and business ethics. Fors Marsh Group has a client screening process in place that includes escalation to and approval by the CEO for any opportunity that involves potentially controversial or sensitive topics. For such work opportunities, additional review is conducted regarding the client's mission, work scope, the potential impact of work against company values, reputational risk, and all possible and likely work impacts (positive and negative). Where the potential for negative impact is identified, consideration is given to what mitigation steps can be taken as well as the opportunity for positive impact.
Related Incidents (Yes/No)	No.
