Disclosure Report

Date Submitted: June 24th, 2025

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Industries reliant upon materials at high risk of human rights infringements

Topic	Jewelry company sourcing precious metals (silver and gold)
Summary of Issue	As a jewelry company, Boma Jewelry operates in an industry that relies on materials that pose a risk of human rights infringements and conflict financing. Boma Jewelry only sources silver and gold for its products from one supplier, which the company has an ongoing relationship with for over 20 years.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	<p>100% of Boma's annual revenue comes from the sale of jewelry made from precious metals (silver and gold).</p> <p>The company does not purchase precious metals directly but instead acquires finished products that contain them.</p>
Impact on Stakeholder(s)	<p>Companies that use precious metals and/or conflict minerals in their products risk contributing to conflict financing or human rights abuses via their mineral supply chains, particularly in the absence of supply chain traceability and management practices.</p> <p>B Lab has flagged the jewelry industry as a material issue after Boma Jewelry was already a Certified B Corp (2021). Should specific performance requirements be created for companies in this industry, Boma Jewelry would be required to meet these standards by a future recertification date.</p>
Implemented Management Practices	<p>For over 20 years, Boma Jewelry has used 1 vendor to maintain its high-quality materials. The supplier's factory is a Sedex Member and undergoes bi-annual audits to maintain membership.</p> <p>Boma's Tier 1 supplier also has a Code of Conduct for its suppliers (Boma's Tier 2+ suppliers) that includes minimum compliance requirements regarding child labor, forced labor, and conflict minerals, as well as requiring its suppliers to adopt a management system to ensure compliance with the Code and requiring suppliers to have an anonymous whistleblowing channel.</p>

	Boma has its own conflict-free minerals policy specific to the Democratic Republic of the Congo and adjoining countries (linked below).
