

SustainabilityWorks

Disclosure Report

Date Submitted: August 20th, 2024

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production of or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒
Biodiversity Impacts	☐	☒
Chemicals	☐	☒
Disclosure Alcohol	☐	☒

Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Other - Clients in Controversial Industries

Topic	Clients in Controversial Industries
Summary of Issue	SustainabilityWorks provides sustainability advisory and ESG training services to companies in the following industries: Alcohol, Charity lotteries, For-profit higher education, Fossil Fuels (others, excluding coal and oil sand), Mining, Pharmaceuticals and Whole life insurance products. The company used to work with clients in the Mining and Whole life insurance products industries in the past 2-5 years, but is not currently working with these sectors. The company's services can be sold to both controversial as well as non-controversial industries.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	From the company's FY2023 annual revenue: -Clients operating in the Alcohol industry represented 5%. -Clients operating in the Charity lotteries industry represented 2.43%. -Clients operating in the For-profit higher education industry represented 5.22%. -Clients operating in the Fossil-fuels (other) industry represented 2.96%. -Clients operating in the Pharmaceuticals industry represented 4.6%. The revenue from clients in the Mining industry in FY2021 represented 4.5%. The revenue from clients in the Whole life insurance products in FY2021 represented 0.85%.
Impact on Stakeholders	Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry. B Lab has flagged the involvement of companies with clients in controversial industries as a material issue and new standards

	will be created to address possible risks related to this matter.
Implemented Management Practices	Currently SustainabilityWorks does not have any specific management practices to mitigate potential risk related to these industries. However, the company implements a Customer Engagement Approach that sets out the Customer screening and due diligence process before deciding whether or not to work with a company if they are in a controversial / sensitive industry.
Report	SustainabilityWorks does not publish a sustainability report, but information on our work and our clients can be found on our website www.sustainabilityworks.ie
Management Comments	<i>As a mission-driven sustainability consultancy, SustainabilityWorks core purpose is to support organisations to be more environmentally and socially responsible, given the urgency of the global situation we face regarding climate change, biodiversity loss, and social inequality. We are committed to only working with organisations who themselves are committed to implementing real and tangible positive change and we consider this when deciding whether or not to say yes to working on a potential project or with a potential client. Our approach to this decision-making is set out in our Customer Engagement Approach.</i>
