

A vibrant photograph of a hummingbird hovering over a bright pink flower with a yellow center. In the blurred background, a monarch butterfly with orange and black wings is visible. The scene is set against a soft, green, out-of-focus background.

CLICKEAT.®

CATALOGUE 2025

*Empowering people for
a more sustainable future.*

Our products are
100% compostable
and certified.

**Verified, no
greenwashing!**

BRAND HISTORY

It is important to tell our story, where we come from and where we want to go.

We were born in **Chile**, a country with an extraordinary nature. This fueled a commitment by the company founders to preserve these natural resources, embarking on a mission that resulted in the inception of the Duo – a pivotal step in ClickEat's evolution away from single use plastics and the catalyst for broadening our portfolio.

* Original sketch of the Duo made by **Alberto González** with **José Allard**, the founders of ClickEat.

At ClickEat today, sustainability is more than a commitment; it's in our DNA. From our packaging to our products, we empower conscious consumers and businesses to eliminate single-use plastics from their daily life. **Home compostable, functional and certified**, that's the ClickEat standard.

Certified

®

Corporation

PHOTOGRAPHER: JOSEFIN NEHG

**A certified B-Corp
is a company that:**

Balances profit & purpose.

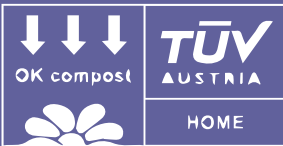

Believes that **sustainable
businesses** are **better businesses**,
and we use them as a force for good.

Looks out for the benefit of
**employees, suppliers, community
& the environment**, it's written in
their legal constitution.

100% OF OUR PRODUCTS ARE CERTIFIED

Why trust us? Because we are telling the TRUTH!

FOOD SAFETY	
	This means that a company must demonstrate that its drug or biological product is safe and effective for the intended use, and that it can manufacture the product to federal quality standards.
	BRCGS certification ensures product food safety and quality, building consumer trust and market opportunities through continuous improvement.
	Global standard ensures safe food throughout the supply chain, complying with legal requirements, and enhancing customer confidence.
	Food Safety certification in France and Germany.

NATURAL COMPOST	
	This provides credible and verifiable proof that your materials are safe for home and garden composting.
	This provides credible and verifiable proof that your materials are safe for home and garden composting for European Standards.
	Green Mark Certified (Taiwan).
	Certified Naturally Compostable Icon.

MANUFACTURING PROCESS	
	SGS certification ensures quality, compliance, and consumer trust globally.
	TUV Rheinland: Globally recognized for quality and safety. Commitment to excellence and customer satisfaction.
	Independant certification that validates compliance in the materials and chemicals used for food packaging production.
	Global standard for quality management, ensuring consistent products, customer satisfaction, and continual improvement.
	Mandatory certification based on product certification that verifies the conformity of products according to the Japanese Industrial Standards (JIS).
	Ensure food safety.

CLICKEAT®

WE ARE EXPERTS
IN COMPOSTABLE
PRODUCTS

Examples of **greenwashing** look out
for the word “biodegradable” and fake
certificates.

COMPOSTING PROCESS

	Materials, packaging and products that can be recycled in industrial composting.
	The product has been independently tested and has been verified to break down completely in a commercial compost facility after use.
	Home Compostable.

GLUTEN FREE

	Gluten Free.
--	--------------

SOCIAL CARE & PEOPLE CARE

	The AMFORI BSCI certification improves social standards in supply chains worldwide, ensuring labor rights, ethical practices, and safe working conditions. It fosters collaboration, transparency, and positive change across the global supply chain.
--	--

RAW MATERIAL

	The forest is being managed in a way that preserves biological diversity and benefits the lives of local people and workers, while ensuring it sustains economic viability.
--	---

CHILEAN EXPORT

	Seal in the promotion of products or services in order to position the value of the chilean origin in the national and international market.

GREENWASHING

BIODEGRADABLE

Biodegradable? Sure, plastic is technically biodegradable... but only if you're willing to wait **500 years** for it to disappear!. Let's stop the greenwashing and demand solutions that biodegrade in our lifetime—not our great-great-grandchildren's!"

RECYCLABLE

Recyclable? Let's call it what it really is: plastic. And here's the shocking truth—only 9% of the mountains of plastic produced every single year actually gets recycled. The rest? It clogs up landfills.

INDUSTRIAL COMPOSTABLE

Industrial compostable? Sounds great—until you learn the catch. It requires specialized industrial facilities to break down, yet **only 1%** of what's produced every year actually makes it there. The rest? Straight to the landfill, where it sits just like plastic, defeating the whole purpose.

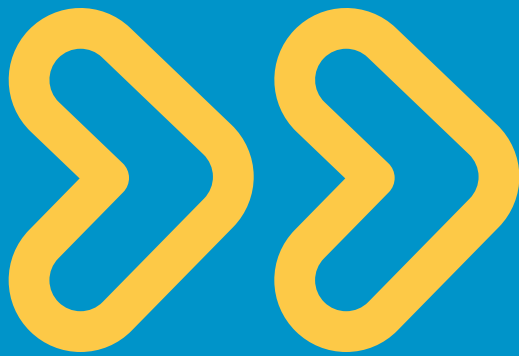

HOME COMPOSTABLE

All ClickEat products fall within this category and are certified home and garden compostable. This allows our products to breakdown in a natural environment, alleviating the need for intervention from industrial or recycling sites.

CLICKEAT®

*Empowering people for
a more sustainable future.*

Birch Wood cutlery

OUR PRODUCTS · **WOODEN CUTLERY**

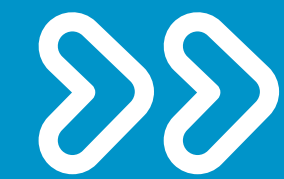

DUO

MATERIALITY: **BIRCH WOOD**

STRONG

Patented single piece construction allows the fork to pierce a raw carrot, the knife to cut anything from a steak to a tomato.

**No splinters
& leaves
no wood taste.**

LIGHTWEIGHT

Weighing about 3/4 the weight of comparable plastic, Duo is strong but also lightweight, making it easier on the hand and less expensive to ship.

HYGIENIC

Since the product has to be opened for use, the consumer has peace of mind that it has not been used or tampered with before. It can also come in a paper sachet, aiding the concept of non-manipulation.

Naturally Compostable.

Suitable for hot foods.

Suitable for frozen foods.

+

*Empowering people for
a more sustainable future.*

OUR PRODUCTS · **BAMBOO FIBER**

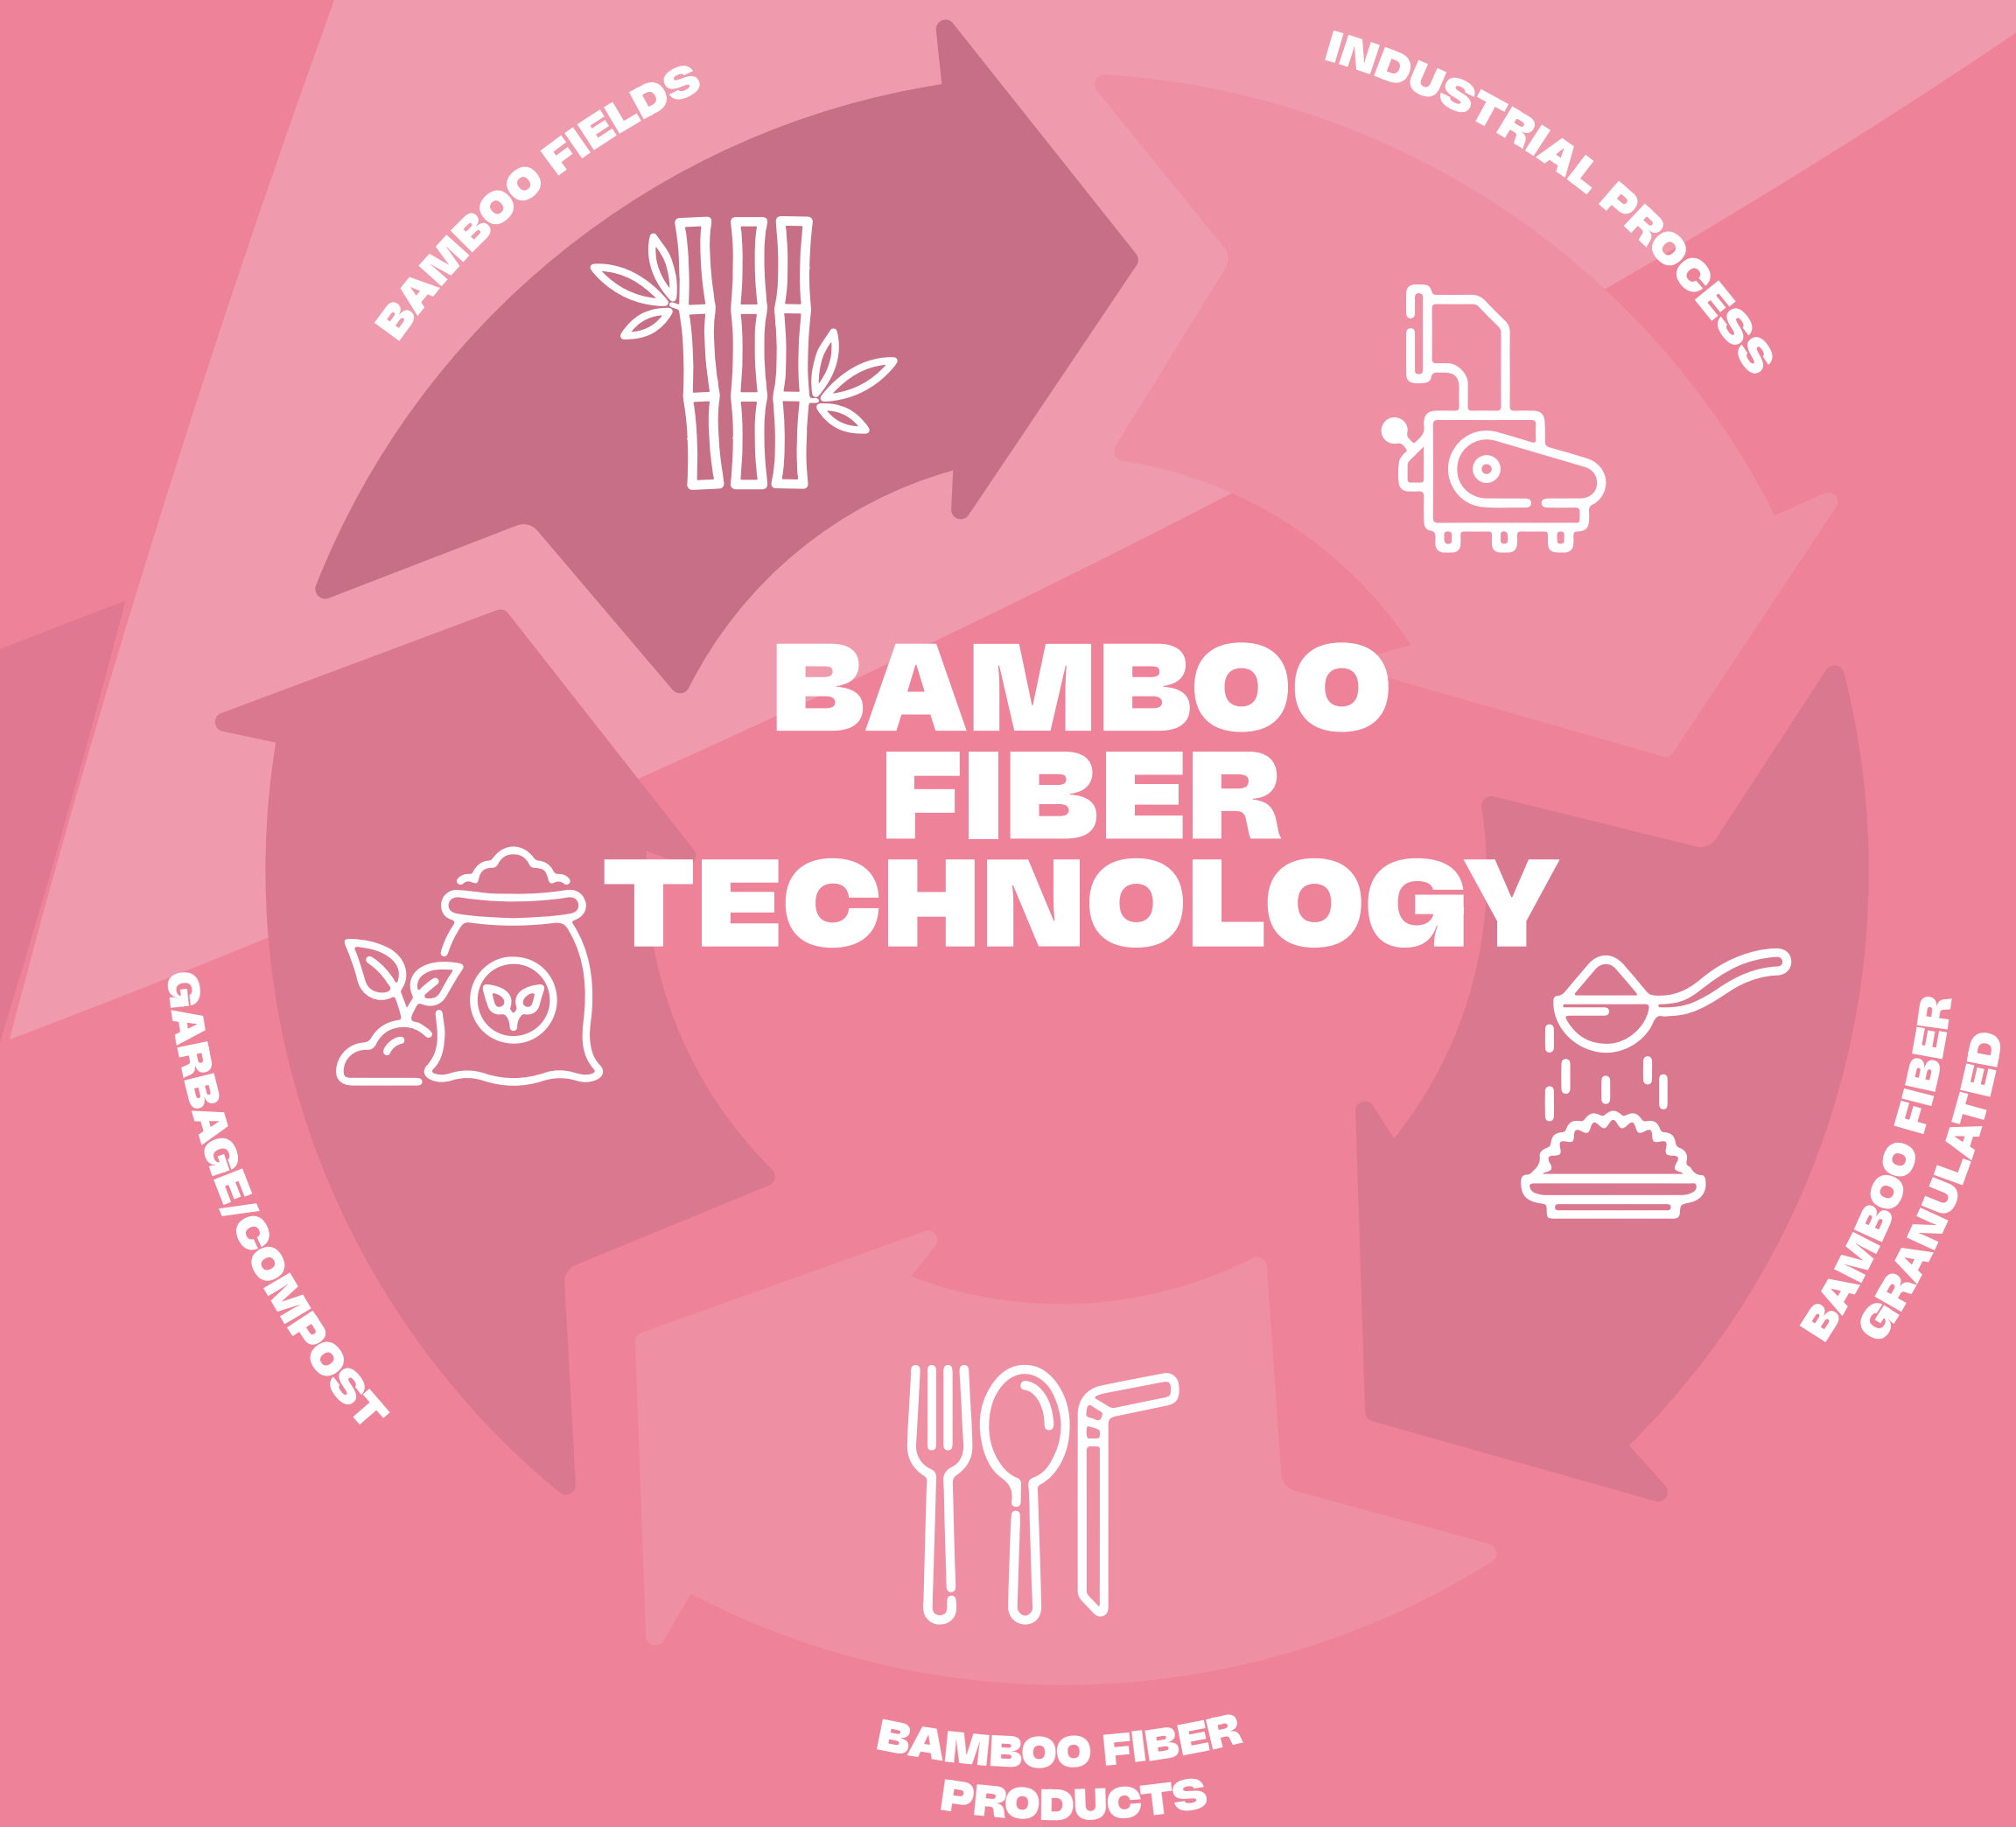

BAMBOO FIBER TECHNOLOGY

Innovation towards a sustainable future

ClickEats bamboo fiber technology is certified home and garden compostable, degrading completely within 250 days. ClickEat specifically works with bamboo fiber due to its expectational durability and sustainability. Bamboo matures in just three years, significantly faster than most other plants, making it an exceptionally renewable resource.

Our bamboo fiber utilizes BioPBS, a compostable biopolymer derived from plant based succinate acid. When mixed with the raw bamboo and starch, the material becomes fully compostable, using a trade secret compounding methodology, producing a balanced formulation to provide an eco-friendly solution for disposable products.

BioPBS is specifically designed to break down more efficiently than standard bioplastics, such as PLA or cornstarch, which requires industrial composting methods. BioPBS has been around for decades but was unpopular due to its tendency for rapid degradation. However, with the rise in demand for compostable food service ware, its properties make it ideal for disposable cutlery and similar formats. Our bamboo fiber technology aligns with the functionality demands of single-use items while maintaining a sustainable end of life. This innovative blend offers a practical and environmentally conscious alternative for disposable tableware.

Rye straws

OUR PRODUCTS · RYE PRODUCTS

WILD STRAWS

MATERIALITY: RYE

ALL NATURAL

Wild straws are extracted from rye fields. They are 100% cereal stalk so they are compostable and chemical free. At the end of their use they can be returned to the ground, avoiding contamination.

STRONG

They stay strong in hot and cold liquids, their different sizes are suitable for a variety of uses, from stir your coffee to drink a milkshake.

COMMUNITY

Our straws are extracted in Lolol, a small town in Chile. We work together and support the community.

ECONOMIC

The Wild Straws are a memorable and an economically viable alternative to plastic, paper and bioplastic straws and is truly “Backyard compostable”. It came from the Earth, it becomes Earth...

HYGIENIC

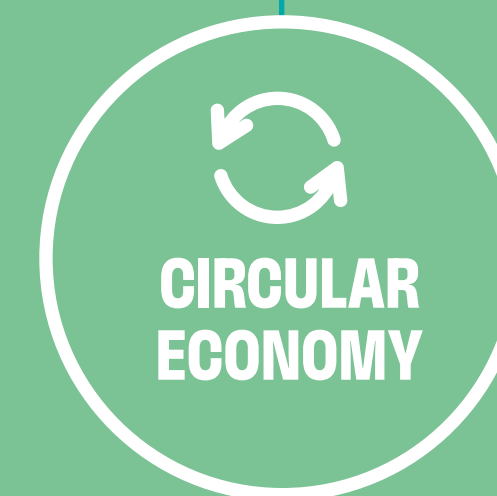

We have the HACCP Certificate, which approves the hygiene in the production and distribution processes.

Designed and produced in Chile.

CLICKEAT®

Marketing Campaign

We will provide a complete **DIGITAL MARKETING KIT**, enabling you to effectively communicate to your customers the sustainable efforts behind our products.

THIS KIT WILL INCLUDE:

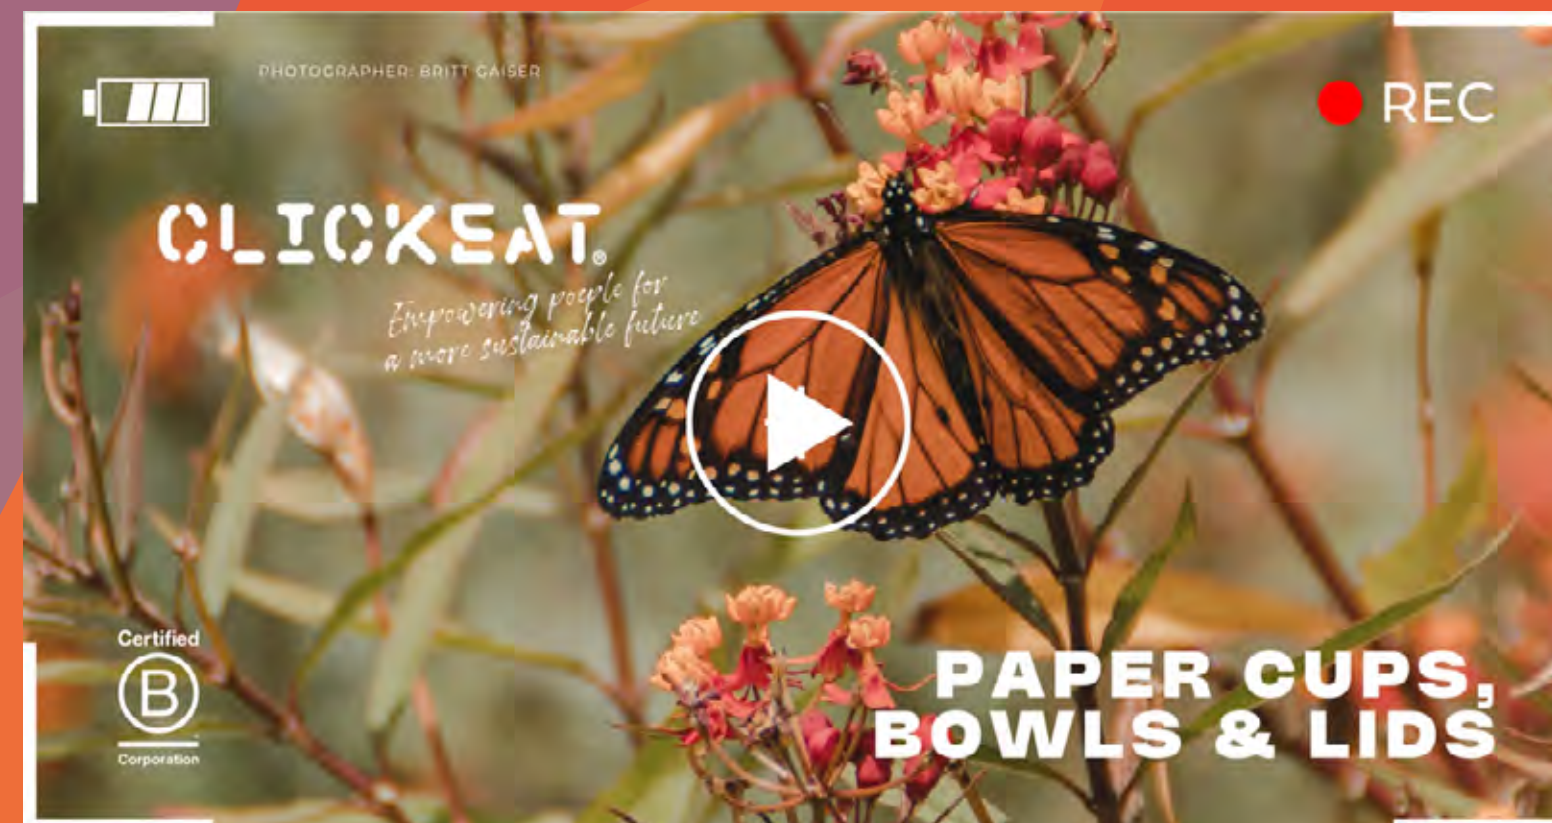

- Diverse content range, featuring product highlights, certifications, and sustainability efforts.
- Assembly videos showcasing the easy-to-follow steps for product setup, aimed at enhancing customer experience.
- Comprehensive support materials, including high-quality photos and product images, ideal for marketing and social media engagement.

MARKETING CAMPAIGN

TAILORED-MADE CAMPAING

Our Marketing team can create a custom campaign aligned with our client's guidelines for use on their social media. The aim is to showcase the products, certifications, and our commitment to the environment and a greener future.

UNIQUE VIDEOS

Our products stand out from the rest of the industry's offerings, which is why we provide various videos to showcase the main features and unique aspects, offering more information to customers and highlighting the characteristics of the products.

*Empowering people for
a more sustainable future.*
