FROM DESIGN TO REALITY

Our in-house design team works every day to create products, even customized, highly technological and ergonomic that meet the needs of the most demanding professionals, without neglecting the unmistakable eye catching Italian design.

From the first sketches, through CAD drawing, prototyping, to the first production and final product industrialization, everything is followed directly and in-house by Tecnodent.

WHAT WE DO

We passionately conceive, design, and manufacture premium dental and medical seating solutions, combining tradition and craftsmanship with innovation and technology to make the treatment experience as ergonomic and satisfying as possible for both doctors and patients.

HOW WE DO IT

Our Research and Development department always brings innovation to the market in terms of design and ergonomics, both for the patient and for the doctor.

Our whole range of products is developed and manufactured in Italy, with a guarantee of high-end quality and attention to details.

Loyalty, respect, transparency, trust and sustainability represent our core brand values and the way we stand out in the market.

DENTAL SEATING

Tecnodent® is renowned in the market for its premium dental chairs and stools, conceived and designed to offer the utmost ergonomics and design to dentists and patients.

From Aesthetic Dentistry to Surgery, from Orthodontic to General Dental treatments, Tecnodent® chairs are designed to fulfill all different dental purposes and meet the most demanding client needs, allowing to accommodate even children, elderly people, or patients with reduced mobility.

MEDICAL SOLUTIONS

Tecnocare® division offers a complete range of top-class high-customized patient chairs, treatment tables and operator stools, from general examination to specific fields, like Aesthetic Medicine, Dermatology, Trichology, Gynecology, Obstetrics, Urology, ENT and more.

Tecnocare® is able to provide a full range of products to equip a complete medical cabinet, assuring total comfort and efficiency in a carefully and design setting according to doctor's and patient's needs.

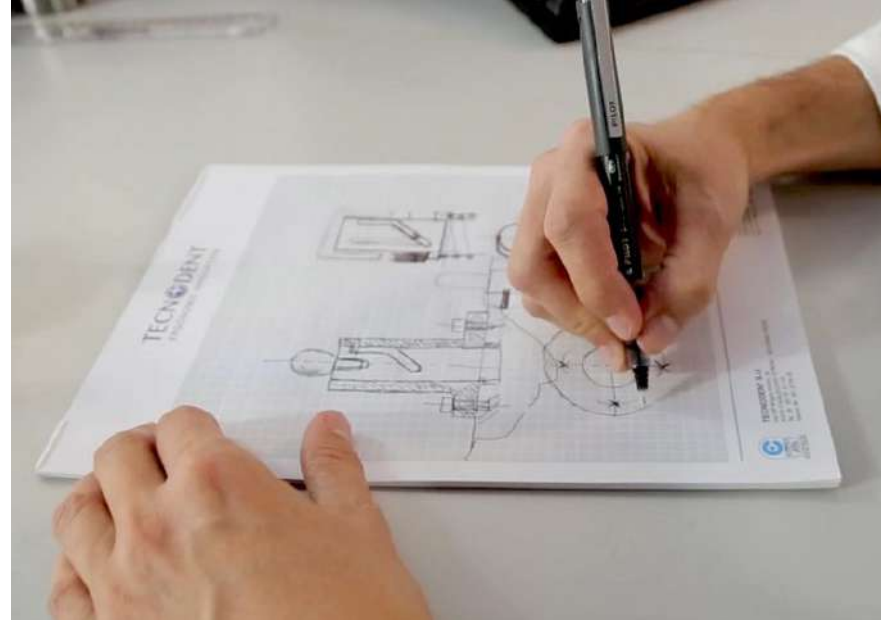

**WHAT MAKES OUR
PRODUCTS UNIQUE?**

INNOVATION

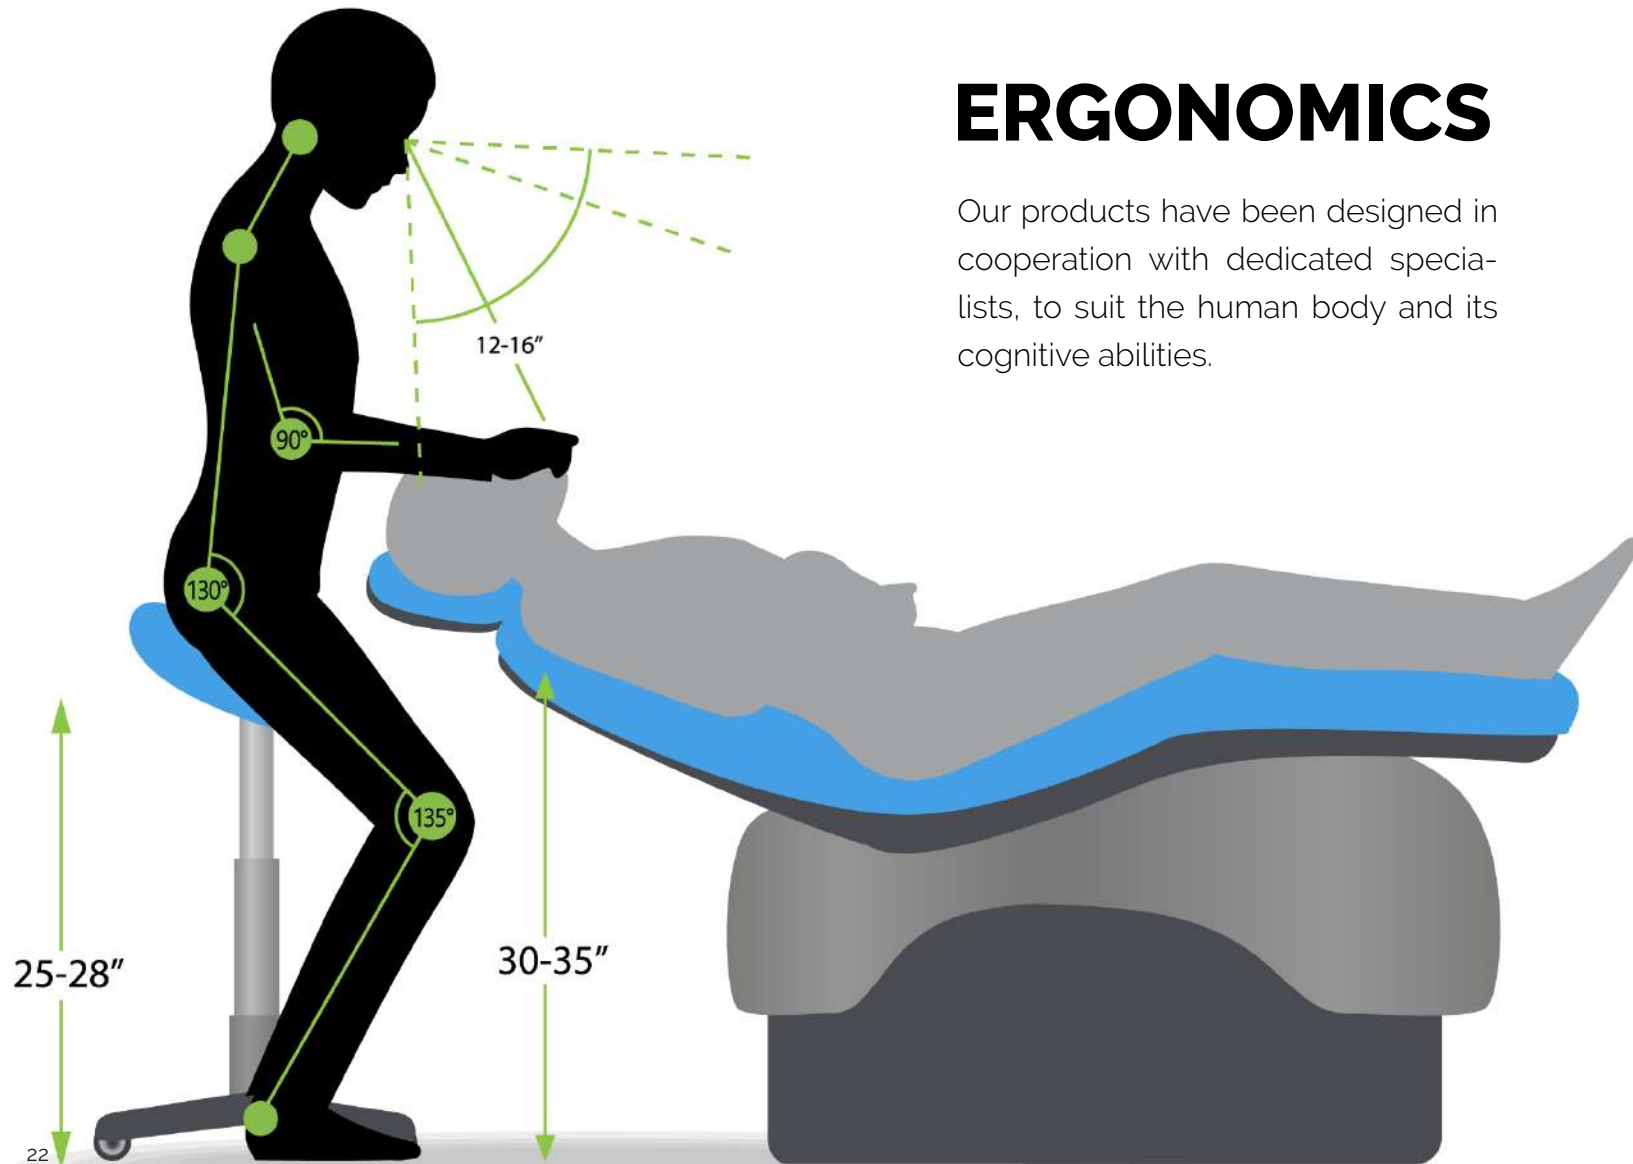

Every single day we invest in research, new design systems and manufacturing technologies, in order to create innovative solutions, both functional and attractive. At the same time, we provide our customers with our renowned expertise in conceiving exclusive solutions according to their specific needs.

FOCUS ON DETAILS

Our products are the perfect combination between strong know-how, craftsmanship, refined materials and futuristic design.

ERGONOMICS

Our products have been designed in cooperation with dedicated specialists, to suit the human body and its cognitive abilities.

HYGIENE

Antifungal and antimicrobial fabric, seamless molded upholsteries, hands-free product features.

DESIGN COLORFULNESS &

The love for beauty, talent and passion that drives our team, allow us to create unique product combinations: elegant shapes, innovative materials and exciting colors stimulate the imagination to create cutting-edge ideas and solutions.

PRODUCT CUSTOMIZATION

We can make your dreams come true: thanks to our craftsmanship expertise, and customization of colors and materials, you can create your own product.

EXPERTISE KNOWLEDGE &

Pioneers in molding structural, flexible, and integral polyurethane: we were the first company to succeed in producing seamless upholstery since the 80s.

Our continuous research on materials enabled us to be successful in molding also memory foam, for the utmost doctor and patient comfort during long treatments.

TECHNOLOGY & QUALITY CONTROL

Every single product undergoes rigorous quality control during each specific stage of production: from assembly to packaging to final product testing.

SUSTAINABILITY COMMITMENT

RESPECT FOR THE ENVIRONMENT

We use HCFC-free polyurethane, which means that our manufacturing process does not release hydrofluorocarbons into the atmosphere.

We have replaced polystyrene in our packaging with polyurethane cushions, which greatly reduces the amount of waste generated.

We have installed photovoltaic panels, eliminated plastic where possible in our canteen, introduced water dispensers and charging station for electric vehicle.

PEOPLE MANAGEMENT

We involve and enhance people skills through ongoing training and coaching, to grow together as an efficient team.

PROSPERITY

We have been awarded among the "1000 best performing companies" in the city of Bologna for our ability to create value for the area.
