Disclosure Report

Date Submitted: December 4th, 2025

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Operations located in Conflict Zones

Topic	Operations located in Conflict Zones
Summary of Issue	Kolet operates in a conflict-affected region through its Tier 1 supplier Sparks, which is based in Israel. Sparks is a key supplier for Kolet's service. The data itself is delivered through Polkomtel in Poland, which reduces direct exposure to conflict. Israel is considered a conflict zone due to ongoing political and military tensions.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	Kolet purchased €80,000 worth of services from Sparks (Israel) in the last fiscal year. No other purchases were made from conflict zones.
Impact on Stakeholder(s)	Business activities located in conflict zones are considered high-risk as they are more likely to cause or contribute to the conflict and/or sociopolitical instability. Countries classified as conflict zones are more likely to have a weak rule-of-law or a corrupt judicial system, which could undermine the effectiveness of operational grievance mechanisms for these businesses and their suppliers. In addition, the safety of the company's workers and other potential human rights violations are at risk.
Implemented Management Practices	<p>Kolet's purchases from the conflict zone are not third-party certified.</p> <p>Kolet ensures responsible sourcing through:</p> <ul style="list-style-type: none"> - Frequent communication with Sparks - Operational oversight and daily responsiveness - Monthly working sessions - Direct engagement with Sparks' CEO <p>Risk mitigation:</p> <ul style="list-style-type: none"> - Sparks only resells Polkomtel data, and all infrastructure is located in Poland, a non-conflict region - In the event of heightened tensions or operational continuity risks that conflict with their SLAs, Kolet can switch providers. The company already has several options in place and will continue to explore further diversification of data providers in 2026.
