

Hanyu Accounting Office

Disclosure Report Date Submitted: July 10th, 2025

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

B Lab's Public Complaints Process

Any party may submit a complaint about a current B Corp through B Lab's Public Complaint Process. Grounds for complaint include:

- Intentional misrepresentation of practices, policies, and/or claimed outcomes during the company's certification process
- 2) Breaches of the B Corp Community's core values as expressed in our Declaration of Interdependence

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Tax Advisory Services

| Topic | Disclosure Tax Advisory Services |
|--|--|
| Summary of Issue | Hanyu Accounting Office, headquartered in Oita, Japan, provides tax-related services to small-medium enterprises (SMEs) from local jurisdictions. Their services include accounting, tax returns, and financial statements. |
| Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected) | In the last fiscal year tax tax-related services accounted for 100% of the company's revenue. |
| Impact on Stakeholders | Businesses have an obligation to contribute their share of taxes. This is because business exists within the context of society; its proper role is to serve society, not the other way around. Moreover, healthy businesses can only exist over the long term in a healthy society. A healthy society depends upon public expenditures made possible by taxes. These public expenditures benefit businesses in both direct and indirect ways. |
| | B Lab recognizes fair payment of taxes as a material business issue and has a Framework for Evaluating Tax Strategies for B Corp Certification. |
| Implemented Management Practices | Hanyu Accounting Office's services are consistent with the principles that (1) the amount of corporate income tax and personal income tax are paid within a one-year period appropriately reflects the actual amount of income generated by the client, and (2) the amount of taxes paid over time in each jurisdiction appropriately reflects the actual operations of the client in that jurisdiction. |
| | To fulfill the tax obligations (ensuring compliance with tax laws and regulations) and to maintain high standards in tax return preparation, Hanyu Accounting Office voluntarily obtained ISO 9000 certification for the first time in the industry. All tax returns are prepared in accordance with the ISO Quality Manual, with thorough review and quality checklists conducted prior to submission. All staff members possess the necessary skills as outlined in the training plan. |

In addition, the company does not enter into advisory agreements with business owners who have committed tax evasion in the past or who are inclined to commit tax evasion. If tax evasion is discovered through a tax audit of a client, the company will terminate the agreement.
