## Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

### **B Lab's Public Complaints Process**

Any party may submit a complaint about a current B Corp through [B Lab's Public Complaint Process](#). Grounds for complaint include:

- 1) Intentional misrepresentation of practices, policies, and/or claimed outcomes during the company's [certification process](#)
- 2) Breaches of the B Corp Community's core values as expressed in our [Declaration of Interdependence](#)

**This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.**

# Disclosure Questionnaire Statement

## Disclosure Questionnaire Category: Animal Testing

<b>Topic</b>	The company tests its products for digestibility and nutritional content at a third-party testing facility.
<b>Summary of Issue</b>	InnovaFeed is an insect producer for animal and plant nutrition. They conduct trials to evaluate the nutritive performance and health benefits that their products (insect protein meal, insect oil) can bring to different animal species (fish, shrimp, swine, poultry) when included in their diets. These tests are carried out in strict compliance with the regulations in force and do not harm the health or welfare of the animals on which they are performed. In general, the tests include feeding experiments (digestibility and performances), they require measurements of weight, feed intake, and collection of feces and blood samples for analysis.
<b>Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)</b>	100% of the company's revenue is generated from the insect products. This accounts for around 10 test trials per year. <1% of volumes are for testing.
<b>Impact on Stakeholders</b>	Animal testing and experimentation are widely used to develop new agricultural products and to test the safety of other products. Many of these experiments can cause pain to the animals involved or reduce their quality of life in other ways.
<b>Implemented Management Practices</b>	<p>Performance and digestibility tests in themselves do not require sampling on dead animals. All incidents are detailed in the research reports. The company does not have a specific animal testing policy but they refer to the National Ethics Committee on Animal Testing charter. They have added the following language to their existing Animal Welfare policy, which states:</p> <p><i>"As part of its research activities, Innovafeed conducts feeding trials to evaluate the performance and digestibility of its ingredients (proteins and oils from the black soldier fly). These trials are conducted in partnership with specialized external organizations that apply the strictest standards of animal welfare. Innovafeed is committed to using alternatives to animal testing whenever possible, such as in vitro testing, and to prioritizing non-invasive approaches that cause no injury or suffering to animals."</i></p>

	The animal testing is carried out by third parties. All testing protocols are submitted to the ethical committee, and the partners visit the experimental installations.
<b>Management Comments</b>	<i>"Our products have antimicrobial properties (Antimicrobial peptides in the protein and Lauric Acid in the Insect Oil), which can provide tremendous animal welfare benefits to farmed animals - specifically for the shrimp industry, which is facing major challenges with bacterial and viral infection, which are wiping out entire farms. In order to demonstrate these antimicrobial benefits, we run mostly in vitro experiments (as an alternative to animal testing), but we also have to conduct in vivo challenge trials. These are required by law to make any health claims, similar to clinical trials with humans for testing new medications."</i>

# Disclosure Questionnaire Statement

## Disclosure Questionnaire Category: Animal Products and Services

**Innovafeed** is involved in the production or sale of animal products and services, meaning that they are more likely to have significant impacts on the environment and animal welfare. Certified B Corps are required to make transparent their involvement in such industries.

---

# Disclosure Questionnaire Statement

## Disclosure Questionnaire Category: Biodiversity and/or Monoculture

**Innovafeed** is involved in activities that could affect local biodiversity, meaning that they are more likely to have significant impacts on the environment, given its interference with the balance of local fauna and flora. Certified B Corps are required to make transparent their involvement in such practices.

---

# Disclosure Questionnaire Statement

## Disclosure Questionnaire Category: Energy and Emissions Intensive Industry

**Innovafeed** is involved in the production/sale of products, or is part of an industry that can potentially be classified as energy and emission-intensive, meaning that they are more likely to have significant impacts on the environment based on their carbon emissions associated with their operations and their contribution to climate change. Certified B Corps are required to make transparent their involvement in such activities or industries.

---

# Disclosure Questionnaire Statement

## Disclosure Questionnaire Category: Water Intensive Industry

**Innovafeed** is involved in the production/sale of products or is part of an industry that can potentially be classified as water-intensive, meaning that they are more likely to have significant impacts on the environment, such as water stress or depletion of local water sources, if water use is not appropriately managed. Certified B Corps are required to make transparent their involvement in such activities or industries.

---

# Disclosure Questionnaire Statement

## Disclosure Questionnaire Category: Other Disclosure Industries

**Innovafeed** is directly involved in the Fertilisers and Pesticides Industry, which is subject to stakeholders' criticism due to potential risks related to ESG aspects. Currently, B Lab does not have specific requirements for this industry; however, Certified B Corps are required to make transparent their involvement in such industry.

B Lab rationale for moving forward with certification:

- The company began their verification process prior to B Lab, identifying the Fertilisers and Pesticides Industry as an industry that may require further risk review.

As B Lab continues to evolve its standards and due diligence approach for this specific industry, the updated criteria will be shared with the company once they are finalized. The company will then be required to meet these new standards by their next recertification.
