

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

False

B Corp Certification - Disclosure Questionnaire Documentation

PROVIDED BY: Mother Kombucha UPDATED AS OF: 07/27/2022

DISCLOSURE QUESTIONNAIRE CATEGORY	Environmentally Intensive Industries
TOPIC	Water Intensive Industries
SUMMARY OF ISSUE	As a beverage manufacturing company, Mother Kombucha operates in an industry that is water intensive. Aspects of the industry that make it water intensive include irrigation used in the cultivation of sugar and tea, water used in the production process, and water used for cleaning and sanitation. The company is water intensive because it is packaging a beverage that is composed mostly of water and then have to clean and sanitize all production and packaging equipment.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	In the previous fiscal year, 99% of Mother Kombucha's revenue was earned from the sale of kombucha beverages
IMPACT ON STAKEHOLDERS	As water intensive industries, beverage manufacturing poses risks such as water stress or depletion of local water sources if water use is not appropriately managed. The company's water is from the city of St Petersburg then goes through a filtration process. According to the World Resource Institute the company's area of Florida is medium to high stress (also what the US averages as a country).
IMPLEMENTED MGT PRACTICES	As a community Florida has watering restrictions during the drier months of the year. The company has a goal for 2022 to track water intensity and is establishing a tracking system of product/total usage and establish target goals for reduction. Some steps the company has taken to minimize its water usage include:. Assessing rinse times for equipment using strips to determine when the chemicals are removed. This sets the actual amount needed to effectively clean without being excessive. The company is able to reuse its caustic cleaning solution for several wash cycles rather than making fresh each day, saving on both water usage and chemical usage. Low flow toilets in building Cleaning process for brewing tanks that includes spraying then brushing rather than filling/soaking off. Spray ball cleaning and sanitizing method rather than filling and rinsing Collecting and retaining kombucha product lost from filtering and re-purposing The company has not conducted and assessment that is industry based but would love to know how to do this and put into its plan.
