

## **DISCLOSURE MATERIALS**

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

## **B Corp Certification - Disclosure Questionnaire Documentation**

PROVIDED BY: WholeTrees, LLC UPDATED AS OF: 06/05/2020

DISCLOSURE QUESTIONNAIRE CATEGORY	Environmentally Intensive Industries
TOPIC	Biodiversity Impact
SUMMARY OF ISSUE	As a company that produces structural wood products using timber as an input material, WholeTrees LLC operates in an industry in which biodiversity impact is a material environmental issue.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	100% of the company's revenue is earned from the sale of structural wood products.
IMPACT ON STAKEHOLDER(S)	Structural wood products utilize wood as the primary input material, which poses a threat to ecosystems and may contribute to deforestation if the materials are not sourced responsibly. In the case of WholeTrees LLC, the company only uses small-diameter and low-value trees for their wood supply.
IMPLEMENTED MGT PRACTICES	The company's business revolves around using lumbar from small-diameter and low-value trees and re-purposing it for high-value structural purposes that otherwise would have used more environmentally taxing materials such as steel and milled wood.  Further WholeTrees Structures works with public and private landowners to source timber from sustainably managed forests, increase forest health, and reduce waste from timber activities by re-directing small diameter and low value trees to high value structural uses.  The forests are managed in a way, and at a rate, that maintains their biodiversity, productivity, regeneration capacity, vitality and their potential to fulfill, now and in the future, relevant ecological, economic and social functions, at local, national, and global levels, and that does not cause damage to other ecosystems.
