Recover-E

Secure. Sustainable. Social Impact.

ISO-Certified Processes

Certified B Corp

Social Enterprise

Carbon Neutral

Who We Are

Recover-E is TechForGood's enterprise-grade IT asset disposal (ITAD) service. We provide Australia-wide solutions for retiring ICT assets securely, sustainably, and with measurable social impact.

Every Recover-E project operates under an independently certified compliance framework, including **ISO 27001** for secure data wiping and **ISO 14001** for ICT recycling, with full documentation passed through to clients.

Your organisation receives **audit-ready, ISO-aligned proof of compliance** for every device processed.

Alongside these international standards, TechForGood is:

- ✓ **A Certified B Corporation®**

- ✓ **A Certified Social Enterprise (Social Traders)**

- ✓ **Carbon Neutral (NetNada)**

Every dollar of profit generated through Recover-E — including any residual value from assets — is reinvested into **Catalysing Connections**, driving our goal of **1 million human connections by 2030.**

Why It Matters

IT asset disposal is no longer just an operational task — it's a matter of **data security, compliance, and ESG accountability.**

Choosing the wrong pathway exposes organisations to:

Data security risks from unmanaged devices	Regulatory breaches with no audit trail	Reputational damage from landfill, greenwashing, or unverified "free" disposal

Recover-E eliminates these risks. Every device is tracked, processed under ISO-certified procedures, and reported with full certification.

The result: secure compliance today and measurable impact tomorrow.

What We Do

Collection

Australia-wide pickup with certified chain of custody

Secure Wipe

Blancco erasure, NSA-grade degaussing, or shredding (certificate per asset)

Residual Value

Any resale value reinvested into Catalysing Connections

Recycle

ISO 14001 + R2v3 downstream partners, zero landfill

Reporting

Audit-ready reports (data erasure, landfill diversion, carbon savings) — ASRS & NGERS-ready

Compliance Framework

ISO 27001
Information Security & Certified Data Wiping

ISO 45001
Occupational Health & Safety

ISO 14001
Environmental Management & ICT Recycling

R2v3
Responsible Recycling Standard

ISO 9001
Quality Management

Independent Certifications

Certified B Corporation®

Verified commitment to people, planet, purpose

Certified Social Enterprise (Social Traders)

Accredited under social procurement frameworks

Carbon Neutral (NetNada)

Independently certified

The Value of Partnership

Working with Recover-E is about more than secure disposal — it's about creating measurable outcomes together.

Security guaranteed

ISO 27001-aligned processes with certified documentation

Compliance assured

ESG and NGERS-ready reporting

Environmental benefits

Circular ICT, carbon savings, zero landfill

Social impact delivered

100% of profits reinvested into Catalysing Connections

Procurement alignment

Counts toward B Corp, Social Traders, and carbon neutral goals

Let's Work Together!

With Recover-E, yesterday's technology becomes tomorrow's impact: secure, sustainable, and socially powerful.
