Disclosure Report

Date Submitted: October 21st, 2025

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Genetically Modified Organisms (GMOs) Industry

UpHouse reported that it works in the Genetically Modified Organisms (GMOs) Industry. GMOs may cause some concerns to consumers about the potential health risks of consuming those products, such as allergenicity, toxicity, or unintended consequences of genetic modification. There are also concerns about the potential ecological risks associated with those products, such as genetic contamination of wild species, disruption of ecosystems, or unintended harm to non-target organisms. Additionally, GMO cultivation could lead to reduced biodiversity if it displaces traditional crop varieties or wild plant species, impacting ecosystem resilience and genetic diversity. Certified B Corps must make their involvement in the industry transparent under their B Corp Profile.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Operations located in Conflict Zones

Disclosure Questionnaire Statement	
Topic	Company has suppliers located in Conflict Zones
Summary of Issue	<p>The company has one supplier headquartered in Israel, which is considered a conflict zone due to the Israel-Palestine war.</p> <p>The supplier, Artlist.io, provides a stock music library used for commercial advertising projects. Before the conflict began, the company reviewed several suppliers and selected Artlist for its quality, ease of use, and clear licensing terms. A one-year contract was already signed before the war started.</p>
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	Approximately 0.3% of the company's total supplier expenditures in the last fiscal year were associated with payments to a supplier headquartered in Israel.
Impact on Stakeholder(s)	<p>Business activities located in conflict zones are considered high-risk as they are more likely to cause or contribute to the conflict and/or sociopolitical instability.</p> <p>Countries classified as conflict zones are more likely to have a weak rule-of-law or a corrupt judicial system, which could undermine the effectiveness of operational grievance mechanisms for these businesses and their suppliers. In addition, the safety of the company's workers and other potential human rights violations are at risk.</p>
Implemented Management Practices	The company's management practices include confirming that its supplier's operations do not support or contribute to the war effort. To reduce exposure to conflict-related risks, the supplier moved the company's account management to its New York office. The company also screens new suppliers to identify where they are headquartered and to avoid sourcing from conflict zones in the future. In addition, a supplier survey has been developed to measure supplier diversity and local spending.
Management Comments	<i>To further reduce any conflict-related risks, our company proactively seeks out music from Canadian artists on the Artlist platform.</i>
