Disclosure Report

Date Submitted: June 30th, 2025

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

B Lab's Public Complaints Process

Any party may submit a complaint about a current B Corp through [B Lab's Public Complaint Process](#). Grounds for complaint include:

- 1) Intentional misrepresentation of practices, policies, and/or claimed outcomes during the company's [certification process](#)
- 2) Breaches of the B Corp Community's core values as expressed in our [Declaration of Interdependence](#)

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Animal Testing

Topic	Animal testing is required by law
Summary of Issue	GENFIT is a biopharmaceutical company, based in France, focused on finding therapeutic and diagnostic solutions targeting severe and life-threatening liver diseases with high unmet medical needs. Regulatory authorities require evidence of pre-clinical testing in animal models before providing approval for clinical trials in humans. The company uses live animals in its R&D activities, as required by law.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	100% of the company's portfolio products undergo animal testing.
Impact on Stakeholders	Animal testing is a material issue in the pharmaceutical industry due to the potential for adverse health reactions caused to animals involved in the process.
Implemented Management Practices	<p>GENFIT conducts internal testing activities in its own R&D Lab and applies the 3Rs principles (Reducing, Replacing, Refining) aimed at reducing the number of animal models used in animal experimentation where possible. The company has internal Animal Welfare Policies: (i) Covering the different control stages during a pre-clinical study in order to guarantee animal welfare; (ii) Covering the control processes for animal experimentation established by the SBEA (the organization in charge of ensuring animal welfare in scientific research in France) and the roles and responsibilities of those involved in animal experimentation for scientific research; (iii) Covering the roles and responsibilities of the SBEA organization and the Ethics Committee on Animal Experimentation in relation to GENFIT and the roles and responsibilities of the in vivo team in relation to the SBEA and the Ethics Committee.</p> <p>GENFIT has established an internal Ethics Committee competent in animal experimentation, which has been approved by the National Committee for Ethical Reflection in Animal Experimentation (CNREEA). In order to guarantee that the teams dedicated to animal experimentation produce quality work while respecting animal welfare, they must maintain a</p>

	<p>good level of competence and training. As a result, an individual training plan and the monitoring of skills have been established. All of these regulatory aspects are subject to regular inspections as part of GENFIT's continued accreditation as an animal testing facility since 2001.</p> <p>In 2025, the company created a Taskforce on alternative methods to animal experimentation and launched a policy on the use of alternative in vivo methods to test the safety and efficacy of its products (using ex vivo, organs on chip, and organoids platforms). The FDA has recently published a roadmap to reducing animal testing in preclinical studies. GENFIT will be closely monitoring developments in this area as it pursues its alternative to animal experimentation program.</p>
