

## **DISCLOSURE MATERIALS**

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

## **B Corp Certification - Disclosure Questionnaire Documentation**

PROVIDED BY: Demoliciones Mitre S.R.L UPDATED AS OF: 05/18/2020

DISCLOSURE QUESTIONNAIRE CATEGORY	Environmentally-Intensive Industry
ISSUE DATE	May 18, 2020
TOPIC	Energy Intensive industry
SUMMARY OF ISSUE	As a demolition and construction company, Demoliciones Mitre operates in an energy intensive equipment in the form of heavy machinery, onsite generators and vehicles for transportation of workers and material.
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	The company has created an inventory of their carbon emissions focussing primarily on scope 1 and 2 emissions and some parts of scope 3. 97% of the company's carbon footprint is due to their scope 1 emissions of which 98% is related to their diesel consumption for their heavy equipment, vehicles and onsite generators primarily used at their construction sites.
	Based on their carbon inventory, the company has estimated their carbon emissions as 161.8 tonnes CO2e / million USD of revenue.
IMPACT ON STAKEHOLDER(S)	The carbon emissions associated with their operations and their contribution to climate change along with air pollution and associated health impacts of air quality are the potential impacts of their energy intensity.
IMPLEMENTED MGT PRACTICES	The company has created an inventory of their carbon emissions for their offices, workshop and construction sites. The company has a target to be carbon neutral by 2030 and to reduce its carbon emission by 10% in 2020 when compared to a baseline of 2019.
	They have also identified a range of measures to meet the carbon neutrality target including carbon offsets through vegetation. Some of these measures have already been implemented such as switching to electric hammers, an electric demolition robot, etc The company has also conducted its first pilot test of replacing onsite power source for construction works, with solar panels.
