

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

DISCLOSURE QUESTIONNAIRE

Company Name: Righthouse Ltd T/A Crystal Doors
Date Submitted: 01/25/2023

Industries & Products	Yes	No
Please indicate if the company is involved in production of or trade in any the following. Select Yes for all options that apply.		
Animal Products or Services		✓
Biodiversity Impacts		✓
Chemicals		✓

DISCLOSURE QUESTIONNAIRE CATEGORY	Facilities located in sensitive ecosystems
TOPIC	The company has a production facility located approximately 10m from The Rochdale Canal.
SUMMARY OF ISSUE	The Rochdale Canal is a sensitive marine environment of historical importance to England's canal & river network and of ecological importance for its support of water plant species. The Canal has been gradually restored for use by leisure boaters since the 1970s. Rochdale Canal is a designated UK Special Area of Conservation (SAC) under the Conservation of Habitats and Species Regulations 2017
SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected)	100% of the company's production is located close to "The Rochdale Canal"
IMPACT ON STAKEHOLDERS	Having facilities near protected/sensitive ecosystems can potentially impact the flora, fauna and quality of the ecosystem (e.g. noise & light pollution from the facilities, spills, air / soil / water pollution owing to company's operations). Company's production process produces a significant amount of wood dust, which needs to be managed and controlled to avoid impacting local air quality.
IMPLEMENTED MGT PRACTICES	• The company's biomass burner was specifically designed by industrial biomass specialists Ranheat to effectively handle the specific MDF wood waste Crystal Doors produces and appropriately manage and minimize emissions to air, • Crystal Door's state-of-the-art Industry 4.0 Ecogate dust extractor, installed in 2017, uses sensors and AI to continuously monitor efficiency and air quality, surpassing minimum air quality requirements.
