

DISCLOSURE MATERIALS

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire and B Lab deems them to be material, the company must:

- 1) Be transparent about the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue.
- 3) Demonstrate that management systems are in place to avoid similar issues from arising in the future.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to background checks by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

B Corp Certification - Disclosure Questionnaire Documentation

PROVIDED BY: Redemption Rock Brewing Co UPDATED AS OF: August 2020

| DISCLOSURE QUESTIONNAIRE CATEGORY | Alcohol |
|--|---|
| TOPIC | Company produces alcohol products |
| SUMMARY OF ISSUE | Redemption Rock Brewing Co is a brewery that earns a material amount of revenue from the sale of alcohol |
| SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected) | In the previous fiscal year, 84% of Redemption Rock Brewery's revenue was earned from the sale of alcohol |
| IMPACT ON STAKEHOLDER(S) | Alcohol may have a negative impact on the health and well-being of individuals and their communities |
| IMPLEMENTED MGT PRACTICES | Yes, Redemption Rock complies with all of the regulations and laws related to sale of alcohol, including taking measures to ensure that we don't serve to anyone under 21 (properly checking IDs, limiting the amount of drinks served to an individual, etc), and not over-serving patrons. All of our staff are certified in safe alcohol service (ServSafe Alcohol), and are empowered to refuse service if a patron displays signs of having too much to drink or being otherwise impaired. In addition, our company employs a 'quality over quantity' approach to encourage responsible consumption, and offer a variety of beers in our taproom which are low to moderate alcohol-by-volume, as well as alternative products such as coffee, tea and seltzer. |

| DISCLOSURE QUESTIONNAIRE CATEGORY | Water Intensive Industry |
|--|--|
| TOPIC | Company produces alcohol products |
| SUMMARY OF ISSUE | As a brewery, Redemption Rock Brewing Co operates in an industry that is water intensive. Water is not only a key ingredient in the final product but also required for cleaning the manufacturing equipment. |
| SIZE/SCOPE OF ISSUE (e.g. \$ financial implication, # of individuals affected) | In the previous fiscal year, 84% of Redemption Rock Brewery's revenue was earned from the sale of alcohol |
| IMPACT ON STAKEHOLDER(S) | Industries that are water intensive risk impacting their local water tables and disproportionately consume water at a rate that contributes to the depletion of local water sources over time if not appropriately managed. Affected stakeholders may therefore include local agriculture, local ecosystems, and communities in water-scarce or water insecure areas. As a small company, Redemption Rock Brewing Co do not consider their water use to |
| | negatively impact the surrounding community. |

IMPLEMENTED MGT PRACTICES

The company measures and records the amount of water used for cleaning/sanitizing solutions and brewhouse processes to avoid excess waste. They also capture the water used for their Heat Exchanger and reuse it as brewing water in the following batch, conserving approximately 310-465 gallons of waste each batch. On the public/taproom side of their operations, they have installed all low-flow appliances wherever possible.

The company estimates that they use at least 4-5 gallons of water for each gallon of beer produced, and aim to not exceed that.
