## Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

# Disclosure Questionnaire Statement

## Disclosure Questionnaire Category: Animal Testing

<b>Topic</b>	The company is legally required by the FDA to carry out animal testing on some of their products.
<b>Summary of Issue</b>	Nuliv Science USA Inc. is a science based ingredients company located in Brea, California. The company sells ingredients and products based on patented ingredients, including mushrooms, and botanicals. The company claims that all animal testing related to their products is legally required by the FDA in order to obtain Generally Recognised as Safe (GRAS) status. This includes individual cell testing and animal testing.
<b>Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)</b>	According to the company, 3 of their 14 active ingredients underwent animal testing. They represent around 35% of the company's gross revenue and 20% of sales growth per year, on average.
<b>Impact on Stakeholder(s)</b>	Animal testing and experimentation is widely used to develop new products and to test the safety of other products. Many of these experiments can cause pain to the animals involved or reduce their quality of life in other ways.
<b>Implemented Management Practices</b>	<p>According to the company, there are no alternatives available as the FDA explicitly demands a 90-day acute toxicity study on rats; The European Food Safety Agency requires a 90-day and, sometimes, a 180-day test depending on the existing toxicity evidence of a food compound.</p> <p>All third-party laboratories must follow Good Laboratory Practices (GLP) and follow strict protocols for animal handling as outlined by OECD guidelines.</p>

## Disclosure Questionnaire Category: Environmentally Intensive Industries

<b>Issue Date</b>	Ongoing
<b>Topic</b>	Water Intensive Industries
<b>Summary of Issue</b>	Sanofi CHC NA does not consider itself to be a water intensive industry. Sanofi CHC NA operates in the pharmaceutical industry which has been recognised as water intensive due to their manufacturing and cleaning processes.
<b>Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)</b>	<p>In the previous fiscal year, 100% of CHCNA at Sanofi's revenue was earned from the sale of over the counter medicines/drugs, food/dietary supplements and cosmetics.</p> <p>NA CHC's water intensity was calculated in 2022 as 0.30 M3 per manufacturing unit.</p>
<b>Impact on Stakeholder(s)</b>	<p>As a water intensive industry, the manufacturing of pharmaceutical products poses risks such as water stress or depletion of local water sources if water use is not appropriately managed.</p> <p>The company has a plant in Chattanooga, Tennessee which sources its water from the public water supply, not considered a water stressed area.</p>
<b>Implemented Management Practices</b>	<p>Although the company does not carry out an assessment of how it compares to others in the industry on a local level in relation to water use as there are no comparable consumer healthcare producers, benchmarks are performed on a global pharmaceutical producer level.</p> <p>Sanofi CHC NA does not have R&amp;D, Bio-technology plants nor chemical plants to manufacture active pharmaceutical ingredients or excipients, nor manage biological products within its portfolio, activities generally recognized in the pharmaceutical industry as water-intensive.</p> <p>Globally Sanofi CHC has the target of reducing water consumption by 20% by 2030, with 2019 levels as a benchmark. All of Sanofi CHC's production sites will contribute to this global reduction, including the Chattanooga manufacturing facility, which is due to conduct a Gap Assessment in 2023 to establish a Water Efficiency Management Plan for NA CHC.</p>
