

Smart waste programs, powered by **data**.™

## What is Scrapp for Business?

Scrapp's proprietary waste tracking technology ensures organizations meet their zero-waste goals by harnessing the power of environmental data. Through a suite of digital tools, Scrapp enables businesses to roll out effective waste programs. Scrapp saves time on waste program management, increases the value of recyclables and improves waste reduction strategies.

## Why Scrapp?

- ✔ Reduces contamination levels by up to 90%
- ✔ Increase recycling engagement by almost 2x
- ✔ Easily track the footprint of any waste stream

## Problem

- ✗ 2B tons of waste is landfilled each year.
- ✗ Waste contributes to 50% of GHG emissions.
- ✗ There are no data metrics on this waste.

Waste is produced through the supply chain. All players are burdened with it's impact. But no data exists on the tracking and management of this waste  
Scrapp is here to solve this.

## Solution

Scrapp is building an ecosystem that connects businesses, brands & retailers, sustainable suppliers, consumers and policymakers. A new ecosystem that will support the transition to the circular economy.

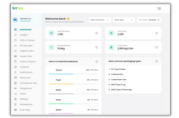

Scrapp's data platform powers a suite of digital tools that are designed to track, monitor and measure the material footprints of multiple waste streams.

**Mobile App**  
Free, global waste scanning app

**Separation Station**  
Waste scanners above bin receptacles

**Web Portal**  
Centralized waste management portal

**There is a lack of data that could ensure businesses meet their zero-waste goals, saving them time and money.**

## Why the Scrapp Solution?

- ✔ Organize waste data across many buildings
- ✔ Flexible monthly subscription plans available
- ✔ Save time on waste reporting and management
