

Meninx AG

Disclosure Report
Date Submitted: May 23rd, 2025

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production of or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒
Biodiversity Impacts	☐	☒
Chemicals	☐	☒
Disclosure Alcohol	☐	☒

Business in Conflict Zones	☐	☒
Child or Forced Labor	☐	☒
Negative Environmental Impact	☐	☒
Negative Social Impact	☐	☒
Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Operations located in Conflict Zones

Topic	Company operates in Conflict Zones
Summary of Issue	The company has independent contractors in the Ukraine, which is classified as a conflict area according to the World Bank's FCS List (2023).
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	0% of the company's revenues came from the conflict zone in the last fiscal year. The company has 16 independent contractors that work exclusively for them. This represents 80% of the company's staff by headcount, or 72% by FTE.
Impact on Stakeholder(s)	Business activities located in conflict zones are considered high-risk as they are more likely to cause or contribute to the conflict and/or sociopolitical instability. Countries classified as conflict zones are more likely to have a weak rule-of-law or a corrupt judicial system, which could undermine the effectiveness of operational grievance mechanisms for these businesses and their suppliers. In addition, the safety of the company's workers and other potential human rights violations are at risk.
Implemented Management Practices	Meninx does not maintain any physical infrastructure entities in Ukraine. Its operations are limited to remote collaborations with a small number of independent contractors who provide software development and testing services. All activities are carried out digitally and securely, without requiring presence or engagement with local institutions or infrastructure. Meninx primarily operates in non-conflict-affected countries, including Switzerland, Germany, Czechia, Spain, France and other non-European nations. The majority of clients, contracts, and revenues are based in stable, regulated environments. Policies and practices to avoid conflict ties or exacerbation: - Strict due diligence and risk assessment prior to any engagement. - No dealings with government, military, or sanctioned entities in conflict-affected zones.
