

Canard & Cie

Disclosure Report
Date Submitted: June 6th, 2023

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Disclosure Industries

Topic	Clients in Controversial Industries
Summary of Issue	Canard & Cie produces video material and has had a client in the fossil fuel industry on an ongoing basis. The content of the videos produced for this client has included transmitting the purpose of the energy industry as well as a video highlighting a bird protection device around their client's wind turbines. The company's service could be sold to other customers in different non-controversial industries, the company has not designed a specific solution for the controversial industry customer.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	Clients operating in the fossil fuel industry represented 0.12% of the company's total revenue in 2022, 1.42% in 2021 and 0.7% in 2020.
Impact on Stakeholders	<p>Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry.</p> <p>B Lab has flagged the involvement of companies with clients in controversial industries as a material issue and new standards will be created to address possible risks related to this matter.</p>
Management Practices	<p>Canard & Cie has drawn up an anti-dream list or blacklist of companies that are too opposed to its values and convictions for it to even consider working with them. It was drawn up taking into account the opinions and suggestions of each member of the team. Subsequently, the executive management finalized the following version:</p> <ul style="list-style-type: none"> • Extremist political parties, which often advocate violence and discrimination against certain communities. • Religious organizations, which can sometimes encourage discriminatory or violent behaviour towards those who do not share their faith.

	<ul style="list-style-type: none"> • Mail order brands, which generally take advantage of people's credulity, such as Phyderma, for example. These brands may sell products that have no real effect or are even dangerous to health. • Monsanto and other major agricultural polluters, which have a devastating impact on the environment and the health of local populations. • Unethical and environmentally unfriendly ultra fast fashion brands such as Shein. These brands can exploit poorly paid people in dangerous working conditions, while massively polluting the environment. • Industries that pollute too much, such as chemical plants or coal-fired power stations. These industries can cause serious illnesses in people living nearby, as well as having a significant environmental impact. • The tobacco industry, which is responsible for millions of deaths every year and often targets young people or vulnerable populations. • The pornography industry, which can contribute to violence against women and children, as well as damaging the mental and emotional health of consumers. <p>Since the founding of Canard & Cie, we have never had to work with a company in one of these sectors (and there is no reason for this to change) but if a request were to arrive, it would automatically be rejected."</p>
