Disclosure Report
Date Submitted: September, 2025

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Other - Cannabis Related Products

Topic	Company sells cannabis-derived products
Summary of Issue	<p>Causemedic provides bodycare products such as oils, creams, and treatments, tailored for spas and wellness environments. The products contain hemp based Cannabidiol (CBD).</p> <p>The company is not involved in the sale of medicinal nor recreational marijuana products.</p>
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	At least 99% of the company's revenue comes from the sales of products containing CBD.
Impact on Stakeholder(s)	Cannabis-related products are subject to controversy both because of their current and historic legal status around the world, as well as concerns about the potential harm that the products may cause. Current regulations governing the legality of cannabis-derived products are complex and vary widely by local jurisdiction.
Implemented Management Practices	<p>All of their products comply with applicable laws and regulations in the US and have provided Certificate of Analysis (COA) for all of its products.</p> <p>The company's farm where the hemp is cultivated, is registered under Colorado's hemp program. The company has independent 3rd party lab tests for every batch of products that is made and has all appropriate state registrations for every state where a secondary registration is required like Utah, Louisiana, Iowa. All of the company's products contain under 0.3% THC which is the legal limit required under the Farm Bill passed by Congress to qualify as industrial hemp.</p> <p>When the company extracts CBD from the plant and has raw CBD crude oil, it is sent to a 3rd party lab for THC, solvent, pesticide & toxin testing. Upon completing the manufacturing process and once the actual finished products are ready, it is again sent to the 3rd party lab for the same testing. All of this information is publicly available through the company's google drive. As the company sells in 50 states, many states require</p>

secondary registrations and the company would reregister every year to show compliance with the Farm Bill. In Utah for example, every year the company would send its labels to them for review and the company would have to pay the government run labs to independently test the company's products for contaminants, toxins, solvents & THC content. For the farm registered in Colorado, the company would renew every year and the auditors can come out at any moment to audit the farm in person.
