Disclosure Report

Date Submitted: August 16th, 2023

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Industries at risk for human rights violations

Topic	Company sources metal precious and diamonds
Summary of Issue	Loft & Daughter is a jewelry retailer and manufacturer whose products utilize precious metals and precious gemstones. These raw materials could be considered conflict minerals and pose a potential human rights risk.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	Approximately 88.8% of the company's Cost of Goods Sold comes from materials that would be considered a high risk for human rights violations.
Impact on Stakeholders	The use of precious metals and gemstones poses a human rights risk due to the possibility that they are sourced from conflict-affected and high risk areas, where they may be used to finance conflict and/or be associated with human rights abuses in the supply chain.
Implemented Management Practices	<p>Based on FY22, approximately 93% of the company's supplier expenses were with WFTO (World Fair Trade Organisation) and FTFI (Fair Trade Forum India) certified suppliers.</p> <p>Loft & Daughter has a supplier code of conduct establishing minimum expectations regarding human rights, business ethics and labor rights for their suppliers. 100% of the company's current suppliers have signed the code of conduct. Loft & Daughter's suppliers are also subject to compliance checks, which can include monitoring, on-site visits, interviews of employed artisans and third party certifications.</p>
Other Management Comments	Since starting my brand and working in jewelry, I have been hyper aware of the importance of working towards a traceable supply chain due to the potential human rights risks posed by the mining of precious metals. I am proud to work with my small fair trade jewelry partner & their shared passion for alleviating poverty and empowering disadvantaged craftspeople. I am also proud to produce in small, unwasteful batches. However, both present their challenges with regards to the availability of traceable materials, and are without doubt, the biggest
