Disclosure Report

Date Submitted: September 15th, 2025

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

B Lab's Public Complaints Process

Any party may submit a complaint about a current B Corp through [B Lab's Public Complaint Process](#). Grounds for complaint include:

- 1) Intentional misrepresentation of practices, policies, and/or claimed outcomes during the company's [certification process](#)
- 2) Breaches of the B Corp Community's core values as expressed in our [Declaration of Interdependence](#)

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Animal Testing

Topic	Company tests their pet food for digestibility and palatability
Summary of Issue	Edgard & Cooper is a Belgium-based pet food company focused on natural and nutritious food for dogs and cats. In partnership with accredited third-party facilities, the company conducts non-invasive digestibility and palatability tests on animals. This process is not legally required by local or national regulation; the company undertakes this process to assess the nutritional adequacy and safety of its products. Testing involves feeding dogs their products in regular quantities and measuring analysis through animal preference (on preference tests - palatability) and fecal outputs (for digestibility tests).
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	In the last FY, 68% of the company's products, as a percentage of total annual revenue, underwent animal testing.
Impact on Stakeholders	Animal testing and experimentation is widely used to develop new products and to test the safety of other products. The company does not partake in any invasive procedures with their animals, thus minimizing the discomfort to the animals.
Implemented Management Practices	Edgard & Cooper has a public Animal Testing Policy where the company states respecting the Five Freedoms of Animal Welfare, committing to making sure that animals have a good life, a good environment, good health, good behavior, and good mental state. The company conducts outsourced and in-house animal testing. The outsourced tests are performed by accredited third-party facilities that adhere to strict animal welfare guidelines. The company's staff, including its veterinarians, regularly visit the facilities to evaluate its conditions and the welfare of the animals under their care. As for the in-house testing, the company uses its own network, the company's employees who have volunteered their pets for palatability testing, and no expectation or burden is placed upon employees who do not wish to volunteer. Pets who are sick are not included in any testing protocol, whether at home or at third-party facilities.

	Over the past five years, no negative impact on the health or well-being of the animals that participated in the tests has been reported.
