

MugenKioku

## Environmental & Sustainability Consulting

Environmental compliance isn't just about regulations—it's an opportunity to **boost efficiency, cut costs, and build long-term resilience**. At MugenKioku, we turn compliance into a competitive advantage, helping industries navigate complex regulations while embedding sustainable practices with measurable results.

**Founded in 2002** by Naomi Stone, MugenKioku is a **certified SBA 8(a), disadvantaged, minority, and woman-owned** firm specializing in **air quality, hazardous waste, stormwater, wastewater, and refrigerant management**. We help private industries and public agencies meet stringent environmental standards while achieving sustainability goals.

Our **certified experts (CPP, QISP, ENV SP)** ensure full compliance with oversight agencies such as the **SCAQMD, CARB, State & Regional Water Boards, municipal water districts, CUPAs, and the DTSC**. Backed by a proven track record in highly regulated industries, we design custom compliance strategies, training programs, and advanced tracking tools that reduce liabilities and optimize resource management.

Beyond compliance, our subsidiary, Enso drives **circular economy solutions**, helping businesses **minimize waste and maximize resource recovery**. Our proprietary tracking tools provide real-time insights, improving decision-making and cost savings.

At MugenKioku, we don't just meet regulations—we help businesses thrive through sustainability, efficiency, and innovation.

### Differentiations

**Individual Attention** from a team of environmental compliance experts, ensuring personalized attention to your facility's needs.

**Proven experience** delivering timely, cost-saving, and successful projects.

**Data-backed results** through industry benchmarking to prevent costly retrofits and compliance risks

**Cost-efficient** strategies that minimize expenses, protects your bottom line while aligning with sustainability and regulatory requirements.

### Core Services

Air Quality

Refrigerant

Greenhouse Gas

Hazardous Materials

Storm Water

Waste Water

## Air Quality Services

Air quality regulations are complex, but compliance doesn't have to be. MugenKioku helps businesses navigate federal, state, and local requirements—ensuring compliance, optimizing operations, and reducing risk.

We develop tailored compliance strategies, perform precise emissions calculations, and maintain real-time digital databases to keep facilities ahead of reporting deadlines. Our **online emissions tracking system provides instant access** to records, streamlining reporting without downloads or delays.

We **prepare businesses for inspections**, conducting audits, identifying compliance gaps, and guiding teams through the process. Beyond compliance, we optimize facility operations to prevent violations and ensure continual compliance.

From air permitting to Title V, RECLAIM, Annual Emissions, and LSI reporting, **we handle the entire compliance process**. Whether managing stationary source emissions or implementing proactive monitoring, MugenKioku keeps businesses compliant, efficient, and ready for any regulatory challenge.

### Service Type:

- Compliance Auditing
- Regulatory Analysis
- Recordkeeping
- Reporting
- Permitting
- Variances
- Agency Negotiation
- Litigation Support
- Onsite Professional Services
  - Daily, Weekly, Monthly, or Quarterly
  - On-Site Assistance as Needed

### Comprehensive Compliance & Emissions Reporting:

#### District, State, and Federal Requirements

- Annual Emission Report (AER)
- Large Spark-Ignition (LSI) Fleet Reporting
- Monthly Recordkeeping and Reporting
- RECLAIM Reporting
  - Monthly Reporting
  - Quarterly Certification of Emission (QCER)
  - Annual Permit Emission Program (APEP)
- Title V Reporting
  - Annual Compliance Certification (ACC)
  - Semi-Annual Monitoring Report (SAM)
- WAIRE Program Reporting

#### Climate Change

- California Global Warming Solutions Act (AB 32)
- Cap-and-Trade Program
- Energy Benchmarking and Disclosure (AB 802)
- Low Carbon Fuel Standard (LCFS)
- Renewables Portfolio Standard (RPS) Reporting
- SB 100 (Clean Energy and Pollution Reduction Act)
- SB 253 (Climate Corporate Data Accountability Act)
- SB 261 (Climate-Related Financial Risk Disclosure Act)
- Transportation and Fuels Reporting
- Zero-Emission Vehicle (ZEV) Mandates

#### Refrigerant Reporting

- Emissions Reporting (RMP Rule)

#### Key Successes

- 90% Reduction in Noncompliance Penalties & Fees  
Partnered with a major aerospace client to navigate complex SCAQMD air quality permitting requirements, implementing a proactive compliance plan that reduced preliminary penalties and recurring fees by over 90%, avoiding costly operational shutdowns.
- 99% Reduction in Refrigerant Emissions  
Developed a comprehensive refrigerant management plan for the largest chemical company in its industry, integrating advanced leak detection technology and preventative maintenance. This initiative cut greenhouse gas emissions by 99%, ensuring full compliance with CARB's Refrigerant Management Program while significantly reducing operating costs.
- Expedited Air Permitting for a High-Profile Facility Expansion  
Led a Title V and New Source Review (NSR) permitting process for an industrial facility expansion, securing approvals six months ahead of schedule while ensuring full compliance with EPA and state air regulations.

## Hazardous Materials Services

Managing hazardous materials isn't just about compliance—it's about protecting your business, reducing liabilities, and ensuring safe operations. MugenKioku provides end-to-end hazardous materials management, helping businesses prevent violations, streamline compliance, and minimize risk.

We handle **hazardous waste permits, renewals, inspections, and fee payments**, ensuring compliance with federal, state, and local regulations. Our team oversees **waste accumulation, labeling, storage, and manifest** recordkeeping to meet strict regulatory standards.

To keep businesses ahead of reporting deadlines, we manage annual submissions such as **eVQ, HMBP, TRI, and Tier II**. We also support hazardous materials storage and manufacturing operations compliance, ensuring safe and efficient facility management.

With expert regulatory guidance and tailored compliance solutions, MugenKioku helps businesses operate confidently in an increasingly complex regulatory landscape.

### Service Type:

- Compliance Auditing
- Regulatory Analysis
- Recordkeeping
- Reporting
- Permitting
- Agency Negotiation
- Litigation Support
- Onsite Professional Services
  - Daily, Weekly, Monthly, or Quarterly On-Site Assistance as Needed

### Comprehensive Compliance & Emissions Reporting:

#### City, State, and Federal Requirements

- Electronic Verification Questionnaire (eVQ)
- E-Waste Recycling Act Reporting
- Hazardous Materials Business Plan (HMBP)
- Hazardous Waste Generator Reporting
- LGQ Biennial Hazardous Waste Report
- Underground Storage Tank (UST) Reporting
- SB 54 (Plastic Pollution Prevention and Packaging Producer Responsibility Act)

### Key Successes

- 100,000 Pounds of Waste Diverted & Circular Economy Advocacy

Through our subsidiary, Enso, we helped businesses divert nearly 100,000 pounds of waste from landfills, advancing circular economy initiatives. We also mentored reputable organizations, including the Los Angeles Cleantech Incubator (LACI), on implementing circular economy strategies for long-term sustainability.

- Eliminated Regulatory Backlog & Achieved Full Compliance in Texas

Developed and deployed a customized hazardous materials tracking system for a high-risk industrial site, reducing manual reporting errors by 90% and ensuring full compliance with federal and state hazardous waste regulations.

- Enhanced Compliance & Emergency Preparedness for Corrugated Box Facilities

Designed and implemented an EPA Risk Management Plan (RMP) and Hazardous Materials Business Plan (HMBP) for corrugated box manufacturing facilities, strengthening regulatory compliance and emergency response while eliminating past violations.

## Stormwater Services

Stormwater regulations are complex, but compliance is critical to avoiding violations and minimizing environmental impact. MugenKioku helps businesses manage stormwater pollution risks, maintain compliance, and streamline reporting.

We assess stormwater management practices, ensuring facilities meet **NOI and NEC** coverage requirements by **identifying pollutant sources and implementing tailored BMPs**. Our team handles NOI and NEC applications, preparing essential materials like Site Maps and Stormwater Pollution Prevention Plans (SWPPP).

To ensure ongoing compliance, we perform **monthly BMP inspections, annual facility audits, and reporting** through the **SMARTS** system, managing sampling results, **SWPPP** amendments, and **Annual Reports**.

With MugenKioku's expertise, businesses can confidently navigate stormwater regulations while reducing risk and protecting water quality.

### Service Type:

- Compliance Auditing
- Regulatory Analysis
- Recordkeeping
- Reporting
- Permitting
- Onsite Professional Services
- Agency Negotiation
- Litigation Support

### Comprehensive Compliance & Emissions Reporting:

#### State Requirements

- Annual Report
- BMP(Best Management Practices) Inspection
- Non-Stormwater Discharge Monitoring
- Sampling Event Visual Observation
- SWRCB (Storm Water Resources Control Board) Permit Fee

#### Key Successes

- Facility of the Year Award for Stormwater Excellence

Supported a manufacturing company in implementing stormwater infiltration systems and advanced filtration, significantly reducing pollutant discharges. These efforts earned the facility the California Water Environment Association (CWEA) P3S Facility of the Year Award for outstanding stormwater management.

- Restored Compliance for a Major Chemical Facility After 30+ Years

Negotiated with the Department of Justice and U.S. EPA to bring a major chemical facility back into compliance after over 30 years of violations. Led the implementation of required procedures, best management practices (BMPs), and reporting systems, ensuring full regulatory adherence.

- Leading Stormwater & Water Efficiency Initiatives for LA Metro

Serving as a key partner on LA Metro's Water Efficiency Task Order, supporting a prime contractor in optimizing stormwater management and water conservation strategies to enhance compliance and sustainability.

## Wastewater Services

Effective wastewater management is key to avoiding violations and minimizing environmental impact. MugenKioku helps businesses meet discharge permit requirements through continuous monitoring, data analysis, and proactive compliance strategies.

We troubleshoot issues, recommend **corrective actions for pollutant exceedances**, and implement **best practices** to **prevent violations**. Our team assists with **permit applications** and revisions, ensuring alignment with current operations and regulatory standards.

To keep businesses compliant, we manage sampling results and reporting, including **Annual Surcharge Reports** and **Self-Monitoring Reports**, ensuring timely submission to local agencies.

With MugenKioku's expertise, businesses can confidently navigate wastewater regulations while reducing risk and protecting water resources.

### Service Type:

- Compliance Auditing
- Regulatory Analysis
- Recordkeeping
- Reporting
- Permitting
- Onsite Professional Services
- Agency Negotiation
- Litigation Support

### Comprehensive Compliance & Emissions Reporting:

- AB 292 (Water Conservation and Efficiency)
- Annual Surcharge Reports
- Wastewater Sampling
- Self-Monitoring Reporting
- Tax Bill Submittal
- Wastewater Discharge Reporting
- Wastewater Volume
- Water Bill Submittal

### Key Successes

- Resolved Persistent Wastewater Violations for a Major Production Facility  
Conducted a compliance assessment for a beverage production plant, identifying inefficiencies in its wastewater treatment system. Implemented process improvements that eliminated chronic exceedances and significantly reduced compliance costs.
- Secured Wastewater Discharge Permits Ahead of Schedule  
Supported a pharmaceutical manufacturer in obtaining an Industrial Wastewater Discharge Permit, successfully navigating complex municipal and state regulatory requirements—completing the process four months ahead of schedule.
- Led Water Efficiency Initiatives for LA Metro  
Managed LA Metro's Water Efficiency Task Order on behalf of a prime contractor, overseeing water conservation measures and sampling coordination. Our leadership ensured effective water reuse strategies, reduced wastewater discharge, and full regulatory compliance.

## The Small Business Advantage

With MugenKioku, you know exactly who you're working with—**no bait-and-switch**, no handoffs to unfamiliar teams. Unlike larger firms, where top experts sell the work but disappear after the contract is signed, our clients receive **direct, consistent support from experienced professionals** who stay engaged from start to finish.

Our **60+ years of combined experience and low overhead** mean you get expert guidance, **faster turnaround times, and cost-effective solutions** without the inefficiencies of a large bureaucracy.

By benchmarking your operations against industry best management practices, we help you **stay ahead of regulations, reduce liabilities, and avoid costly retrofits.**

Environmental compliance shouldn't be a financial burden. Let MugenKioku show you how proactive compliance can **save your facility money** while enhancing operational efficiency.
