

Wordbank Marketing Ltd

Disclosure Report

Date Submitted: December 4h, 2023

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production or trade in any of the following. Select Yes for all options that apply.

Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Other - Clients in Controversial Industries

Topic	Clients in Controversial Industries
Summary of Issue	Wordbank Marketing is a marketing company that offers its marketing and branding services to clients in the Mining industry. Their services can also be sold to non-controversial industries.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	In 2022, 4.5% of the company's revenue comes from the Mining industry.
Impact on Stakeholders	Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry. B Lab has flagged the involvement of companies with clients in controversial industries as a material issue and new standards will be created to address possible risks related to this matter.
Implemented Management Practices	The company scores all clients and prospective clients on comprehensive criteria, including the industry they're in, whether they are a certified B Corp, ESG & CSR scoring, company culture, and alignment to the company values. In cases where a client or prospect fits into a more controversial industry or if they score a negative number on any criteria, Wordbank Marketing conducts a deeper analysis and research on their business practices, including sustainability efforts. With that deeper research, the company looks at the severity of impact, their ownership, climate & sustainability efforts, etc. In some cases, the company decides to no longer work with them and in others, the company may look at projects on a case by case basis. If the company is neutral on a client, it will not pursue growth opportunities or may recommend another agency solution for these clients.
