

Rigrun Ltd

Disclosure Report

Date Submitted: December 13th, 2022

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

This document contains a copy of the company's completed Disclosure Questionnaire and related disclosure documentation provided by the company

Disclosure Questionnaire

Industries and Products

	Yes	No
Please indicate if the company is involved in production or trade in any of the following. Select Yes for all options that apply.		
Animal Products or Services	☐	☒
Biodiversity Impacts	☐	☒
Chemicals	☐	☒
Disclosure Alcohol	☐	☒
Disclosure Firearms Weapons	☐	☒
Disclosure Mining	☐	☒
Disclosure Pornography	☐	☒
Disclosure Tobacco	☐	☒
Energy and Emissions Intensive Industries	☐	☒
Fossil fuels Gambling	☐	☒
Genetically Modified Organisms	☐	☒
Illegal Products or Subject to Phase Out	☐	☒
Industries at Risk of Human Rights Violations	☐	☒
Monoculture Agriculture	☐	☒
Nuclear Power or Hazardous Materials	☐	☒
Payday, Short Term, or High Interest Lending	☐	☒
Water Intensive Industries	☐	☒
Tax Advisory Services	☐	☒

Outcomes & Penalties

	Yes	No
Please indicate if the company has had any formal complaint to a regulatory agency or been assessed any fine or sanction in the past five years for any of the following practices or policies. Check all that apply.

	Yes	No
Please indicate if any of the following statements are true regarding your company's significant suppliers.		
Business in Conflict Zones	☐	☒
Child or Forced Labor	☐	☒
Negative Environmental Impact	☐	☒
Negative Social Impact	☐	☒
Other	☐	☒

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Disclosure Industries

Topic	Clients in Controversial Industries
Summary of Issue	Rigrun is a digital health platform specifically designed for employees working in Remote Sites. This includes but is not limited to the Offshore Energy Sector (Oil and Gas Production & Drilling), Supply Vessels, Survey Vessels, Cargo Ships, Forces.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	Fossil Fuel Industry represents 100% of their total revenue for FY21.
Impact on Stakeholders	Companies that work with clients in controversial industries can indirectly increase the harmful impact to stakeholders by enabling business growth. Therefore, companies that work with clients in these industries should have practices in place to ensure that their impact is aimed at decreasing the negative impacts of the industry. B Lab has flagged the involvement of companies with clients in controversial industries as a material issue and new standards will be created to address possible risks related to this matter.
Implemented Management Practices	All UK offshore oil and gas operations must adhere to strict environmental legislation as per environmental legislation . In terms of screening new clients and monitoring repeat clients, Rigrun makes use of publicly available environmental performance reports that companies operating in the UKCS must produce annually. Within these reports companies must reveal publicly their compliance/non-compliance to environmental legislation for the fossil fuels sector. Where a company has breached offshore environmental legislation Rigrun looks at the remedial steps taken to deal with this breach and prevent further such breaches in the future.
Management Comments	Due to the regulations, fines and business consequences of breaches in environmental performance in the UKCS Rigrun has not yet found a company who falls below the strict legislative standards. When companies fall below environmental standards they are always issued with an improvement notice by a government inspector. If they do not make the improvements

	requested then they are required by law to shut-down/cease their operations. Because the procedures for environmental performance are so high and so strict in the UKCS Rigrun believes that monitoring the publicly available environmental reports is sufficient at this time.
