and vetted local contractors!**

QuitCarbon is a proud ENERGY STAR® partner with support from the US Department of Energy.

**Maximize your home
comfort, efficiency,
and savings.**

QuitCarbon

Why should you get gas out of your home?

“Natural” gas pollutes our homes, harms our climate, and hurts our wallets:

- **42% increase** in kids’ asthma rates
- **4x more toxic gas** than CA power plants

Modern electric homes are safer, cleaner, more affordable, and more fun!

California is Quitting Carbon

Annika, Berkeley

*“It’s complicated to get your home off fossil fuels. **QuitCarbon made it way easier overall.**”*

Steven, San Diego

*“**Great idea and great service** to homeowners facing a complex array of options and rebates.”*
