Disclosure Report

Date Submitted: May 18th, 2023

Disclosure Materials

Certified B Corporations must complete a Disclosure Questionnaire to identify potentially sensitive issues related to the company (e.g. historical fines, sanctions, material litigation, or sensitive industry practices).

This component does not affect the company's score on the B Impact Assessment. If the company answers affirmatively to any items in the Disclosure Questionnaire that B Lab deems relevant for public stakeholders, then, as a condition of their certification, the company must:

- 1) Be transparent about details of the disclosure issues identified on the company's public B Impact Report
- 2) Describe how the company has addressed this issue
- 3) Demonstrate that management practices are in place to avoid similar issues from arising in the future, when necessary.

In all cases, the Standards Advisory council reserves the right to refuse certification if the company is ultimately deemed not to uphold the spirit and integrity of the community.

In addition to the voluntary indication of sensitive issues in the Disclosure Questionnaire, companies pursuing Certification also are subject to a background check by B Lab staff. Background checks include a review of public records, news sources, and search engines for company names, brands, executives/founders, and other relevant topics.

Sensitive issues identified through background checks may or may not be within the scope of questions in the Disclosure Questionnaire, but undergo the same review process and are subject to the same possible review by the Standards Advisory Council, including ineligibility for B Corp Certification, required remediation, or disclosure.

Disclosure Questionnaire Statement

Disclosure Questionnaire Category: Litigation, Arbitration, and/or Penalties

Issue Date	2022
Topic	Litigation related to alleged service quality issue
Summary of Issue	Company has been involved in two claims. Both arose due to errors within analysis modeling during the design stage by HTS, which were only identified while the projects were being constructed. The result was remediation works to the structures affected, and additional construction programme in both cases.
Size/Scope of Issue (e.g. \$ financial implication, # of individuals affected)	Heyne Tillett Steel reported 2 litigation cases filed against the company. One was settled with the financial amount corresponding to 9.7% of the company's annual revenue and the other one is pending and the financial value associated with the claims represents 5.9% of the company's annual revenue.
Impact on Stakeholders	Both cases affected client and contractor, causing a delay to the completion of construction. It meant the clients could not receive revenue from rents when they had expected, costs that were covered by professional indemnity insurance.
Resolution	The company reported that both cases have been settled.
Management Practices	<p>The company has tightened the QA procedure for analysis models, continuously highlighting the importance of hand calculations for verification, as well as sharing lessons learnt with the whole company.</p> <p>The company has implemented the following measures to help mitigate similar issues:</p> <ul style="list-style-type: none">• Introduced a model check by an engineer external to the team as part of our QA process.• While an analytical model check checklist existed at the time, this has been increased in detail.• The QA process was given greater visibility by introducing a summary portal in the practice project and invoice management system to allow a simple and clear way of reviewing the QA process and ensuring that the checks are being completed.• QA processes are now discussed at the regular Associate meetings to review findings and allow

	<p>continuous improvement and knowledge sharing.</p> <ul style="list-style-type: none">• We have added these examples into an annual practice wide talk about avoiding design errors to highlight that simple errors can have disproportionate results.
Related Incidents (Yes/No)	There were nine notifications that did not turn into lawsuits.
